# Robotic Power Platform: 4-Hr Assessment

Learn how to free your team from tedious tasks with RPA.

Rhino Systems' Power Automate sample application

In a 4 hours workshop, we will demonstrate the capabilities of RPA & Power Platform.

RPA & Power automate is the single solution that brings together robotic and digital processing along with robust AI to help you orchestrate your business process.

Rhino Systems will demonstrate the platform capabilities and we will design a step by step workflows that will automate manual activities from one of your business process.

In this session, we will showcase how with bots, you can take care of repetitive manual process so your workforce can get more done.

After this hands-on workshop, you will understand the platform's potential and will uncover ideas into how to design and build RPA's.
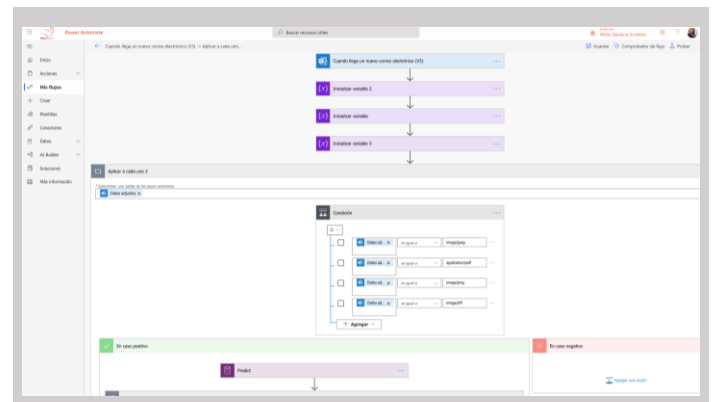

4 Hours Asestment offer

Our Offering includes:
