XOAP

XTRA ORDINARY AUTOMATION PLATFORM

Platform for IT infrastructure & workplace automation

Why use XOAP:

- Reduce operational costs
- Simplify IT complexity
- Enhance security compliance
- Scale seamlessly
- Accelerate digital transformation
- Release from vendor lock-in

Read more about why XOAP

XOAP™ is an all-in-one platform for hybrid IT automation, enabling organizations to automate entire infrastructures – virtual desktops, notebooks, servers and more – across multiple accounts and platforms.

The SaaS platform takes care of everything from a single UI without the need to install or update management infrastructure. Whether you prefer the public cloud or your own data center, XOAP helps design your organization's IT according to its requirements, budget and security needs.

XOAP is an enterprise automation platform that empowers organizations to simplify and scale secure IT management.

Start for free

Configuration Management
Agentless IT automation for consistent system configuration across all devices and tenants.

Application Management
Deploy applications to an unlimited number of systems inside and outside the enterprise network.

Image Management
Customize and automate image build pipelines as needed; across multiple platforms, accounts & subscriptions.

API & Extensions
Integrate third party solutions such as Citrix, Omnissa, VMware, Ivanti, F5 and others.

Insights
Enterprise analytics without providing any backend. No setup required with readily available dashboards.

Platform Management
Fully reproducible IT infrastructures on different platforms like AWS, Azure, GCP or on premises.

Cut costs, boost efficiency, accelerate innovation.

XOAP's open architecture reacts to the most diverse demands of scripting and coding in multiple cloud or hybrid environments – intuitively drilled down to one simple console for a seamless administration of most complex demands.

Enable seamless cloud transformation and IT modernization by automating infrastructure and applications across hybrid environments.

Optimize IT spending, reduce licensing costs, and enhance operational efficiency, ensuring maximum return on investment.

Standardize and streamline IT processes to drive efficiency, scalability and consistency across business operations.

Save on the total cost of ownership (TCO). Optimize your IT investments and create long-term value for your business.

Strengthen your IT strategy by minimizing dependence on external vendors, specific technologies or software.

Simplify the onboarding process for new team members, ensuring a smooth transition during periods of staff turnover.

Empower employees with an intuitive IT management tool that makes their jobs easier. Simplify repeatable tasks across all tenants.

XOAP is all about simplifying IT management. With us, you get a flexible on-prem and cloud management platform that adapts to your business needs — without disrupting what's already working.

With XOAP™, organizations can manage, automate and standardize IT delivery across multiple customers and environments. It works with on-premises, hybrid and (multi) cloud infrastructures, including AWS, Azure and Google Cloud.

Combined with the task scheduling option, XOAP's modules provide a comprehensive yet easy-to-use solution. Long and tedious tasks are automated in a few clicks while the integrated analytics and reporting features help with documentation, analysis and strategy.

XOAP is a secure solution suitable for highly regulated industries. Developed and operated exclusively in Europe and hosted only on BSI-C5-certified platforms, it complies with leading industry standards and new EU cybersecurity requirements.

XOAP accounts are securely encrypted, accessible only to authorized users, with customers retaining full ownership and control. Also, XOAP's automated incident detection and response reduces the risk of undetected breaches.

Pricing starting at €337/month

Enterprise, MSP and Public (Education) plans available.
