

Azure Cloud App Modernization Assessment Package

Key Activities and Deliverables

ACTIVITIES

DELIVERABLES

Legacy System Study & Analysis

Detailed analysis of legacy systems including architecture, codebase, dependencies, and performance metrics.

Identification of key challenges, risks, and opportunities for modernization.

- ✓ Legacy system review report
- ✓ Functional solution
- ✓ Code review report
- ✓ Current technical solution & infra review
- ✓ Bottlenecks and opportunities

Technical Solution

Formulate tailored strategies and recommendations for app modernization using azure services and best practices.

- ✓ Modernization approach and solution document

Identify Proof-of-Concept (POC) Business Case

Identify critical business case for POCs to validate the feasibility and effectiveness of modernization strategies on Azure.

- ✓ POC solution document for concept & feasibility

Recommendations and Roadmap Creation

Provide detailed recommendations and roadmap for full-scale modernization, considering business objectives and constraints

- ✓ Techno functional proposal with roadmap and commercials
- ✓ Cloud costing analysis
