

Migration from Zoho Mail to Microsoft 365

How can we help you?

We'll help you switch to Microsoft 365 and migrate your data and files from Zoho Mail.

At the same time, we are aware that switching productivity tools may seem difficult. But we are here to overcome any problems that may arise and to show you how to make the most of your Microsoft 365 solution.

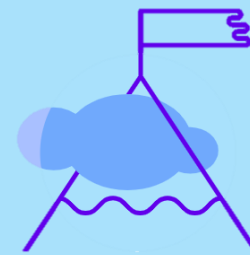

From Zoho Mail to Microsoft 365

Helping you switch faster and safer

Our advantage

We use automation as much as possible during migrations, allowing us to keep costs low and maintain a high standard of quality.

Gold
Microsoft Partner

Key migration deliverables

Microsoft 365 Portal Setup

We'll set up your Microsoft 365 portal and configure security policies according to best practices.

Migration of Email

We'll migrate emails, contacts and calendars from Zoho mail using native Microsoft migration tools.

Post deployment support

We're here to help you overcome any problems that might arise and show you how to use it at its full potential with Microsoft 365 solution.

Setting up Microsoft 365 accounts & Email groups

We'll send a Welcome Email to each user, and we'll help you set up your accounts & migrate email groups.

Creating one SharePoint site

We'll create an internal company portal for sharing and organizing files in document libraries.

Setting up PC & mobile devices

We'll help your users to setup up their Mobile devices.

Adoption Workshop

2h Training session to familiarize users with the new Microsoft 365 tool.

Why Microsoft 365 ?

Stay connected. Secure your business. Be more productive.

Microsoft 365

a core Microsoft product

Speed of change is greater

Microsoft invests more in 365, so it evolves faster than Zoho email.

Native Integration with Office

Most business users use Microsoft Office for Word, Excel, PowerPoint, etc.

Integrated device management

Microsoft 365 allows IT to manage and secure devices through centralized policies

Teams' communication platform

Teams is an integrated communication platform (chat, video call, webinars, phone integration, apps) in Microsoft 365

More Microsoft apps

There are wide range of useful apps included in Microsoft 365 available, like OneDrive, Planner, Bookings, Stream

Microsoft 365 for businesses

It may provide a more natural fit for businesses that are mostly Windows-based due to native integrations (also more apps – notably Access and Publisher – are available on the Windows-based version, along with performance monitoring tools too).

Generous file storage and email storage

Unlike Zoho mail, Microsoft 365 has a full featured cloud document storage that allows simple sharing and seamless collaboration for individual users.

Microsoft Office

Most customers have already used Microsoft Office so, interacting with Microsoft 365 is much easier.

Azure Active Directory

It has better management of endpoints and people via industry-standard Active Directory.

The desktop version of Outlook

Has native integration with Microsoft 365 allowing syncing calendars and contacts.

Our principles

Professionalism

- We try to do our best and grow professionally every year.
- We use automations to maintain a secure and efficient workflow.
- In addition, the fact that we do not have sales targets to fulfil for one product or another gives us the freedom to offer our customers custom solutions that best fit their requirements.

1

Openness

- We know that not always our services fit perfectly on certain requirements, so we do not try to always sell the solutions by ourselves.
- We are open, and when appropriate, we recommend third-party companies.

2

Stability

- We have been active in this industry since 2001, and most of our customers have stayed with us all this time.
- We believe this proves our customers' appreciation and the fact that the experience we have accumulated in all these years allows us to keep our promises.

3

Helping people discover technology

Appropriate IT solutions

We don't pursue sales targets and bonuses for reaching them for the products or solutions we offer you.

22 years

22 years of activity means 22 years of constant improvement and dedication to our customers.

Solid competencies

We grow professionally from year to year, and we are constantly researching new technologies.

Complete solutions

We offer full-service solutions, ranging from helpdesk and server administration to data organization and analysis.
