

Cloud Security Review Service Definition Document

risual Ltd

Cloud Security Review

Description

Misconfiguration of Microsoft 365, Azure and Dynamics 365 can leave your organisations data exposed to cyber-attack and threats. Our engagement will undertake review of the configuration of these services, against industry standard security guidelines and work with you to create defined next steps to enhance security of these services.

Features

- Uses our internally developed scripts to query Microsoft Security settings to discover the current configuration.
- Identifies security misconfigurations and features
- Hands on training for IT Admins and professionals on Microsoft Security assessment tools.
- Identifies how your organisation can take full advantage of Microsoft's extensive cyber security protection capabilities.
- Highlights licensing requirements and service levels.
- Creates prioritised recommendations for implementing end-to-end organisational security posture
- Review of your Microsoft 365, Azure and Dynamics 365 to elevate your security posture with recommendation playback and documentation covering :-
 - Identity and Access Management
 - Governance
 - Security Center Configurations
 - Regulatory Compliance
 - Audit and Monitoring
 - Roadmap for improvement

Benefits

- To help organisations get to grips with their current security position for these Microsoft cloud services.
- risual are compliant with over 90 standards including ISO270001.
- We will show you how to use the Microsoft tools so you can regularly check your security position.
- Helps your to plan how to increase adoption of security related technologies.
- Helps to identify gaps in the organisations ability to adopt a zero-trust security approach.

Cloud Security Review

Review compliance and assess current security posture in just 4 days

Day 1 - Discovery

Deployment of security assessment tools

Interviews with organisations security stakeholders

Day 2 - Assessment

Review of the security assessment tools

Information gathering on existing services

Knowledge transfer of assessment tools and security features

Days 3 & 4 - Planning

Documentation of recommendations

Playback of recommendations

Planning of next steps

About the engagement

We will confirm the focus of the engagement with you on day one.

We can assess the security configuration of Microsoft Office 365, Microsoft Azure IaaS and PaaS and Dynamics 365 together or we can review them individually if you have particular concerns.

In order to run the assessment successfully risual would require the following prerequisites:-

- An active and licenced Microsoft Office 365 Business or Enterprise tenant
- A Microsoft Azure tenant with live subscriptions enabled
- An active and licenced Dynamics 365 tenant
- An account assigned against at least one of the following Microsoft 365, Azure and Dynamics roles.
 - Global administrator
 - Security administrator
- Access to Microsoft Teams or video conferencing solution to allow for the interviews to take place.

Day 1 – On day 1, our Security Experts will work with you to truly understand your current challenges, existing solutions, and wider technology ecosystem. We will invoke the Microsoft Secure Score and Azure Security Center services using our custom develop scripts where possible. Our expert will interview your organisations security stakeholders to ensure we understand the current and future requirements.

Day 2 – On day 2, the risual team will review outputs from the tools and scripts to ensure the required information has been captured and reported on. If required further interviews will also ensure we have gathered all the information needed to create our recommendations for your security assessment. Our subject matter expert will perform knowledge transfer with you to show you how to re-run the assessment tools again in the future and go through any security tools or features that are of most value.

Day 3-4 – On days 3 and 4, the risual team work to create a recommendations document that will be presented to the organisation's security stakeholders. The recommendations document will remain with you as a reference for future projects.

Our experts will then work with you to define next steps and understand how risual can support you the organisation to implement the recommendations

About risual

Who we are, what we do, and who we work with

About risual

Microsoft Experts for 16 years, we have deep product knowledge across Microsoft technologies and a broad range of experience across industry. Born from a belief that technology can change the world in sustainable ways that drive positive social and societal change, we endeavour to learn, develop and invest in our people and communities, delivering world class services that create value and opportunities for all.

UK-based business & technology services organisation, offering consultancy, managed services, training & adoption, education, and apprenticeships for cloud technologies.

16 years transforming the workplace through the introduction, adoption and strategic management of Microsoft technologies.

Accredited to ISO 27001, ISO 20000, ISO 9001, Cyber Essentials, Cyber Essentials Plus, and members of the NCSC's Cyber Security Information Sharing Partnership (CiSP).

Microsoft Gold Partner across 15 categories and an Azure Expert MSP, placing us in the top 0.05% of MS partners globally and are a Microsoft Fast Track Ready Partner.

An elite Microsoft Partner, we also have 6 Microsoft advanced specialisations, validating our extensive capabilities in specific solution areas.

We're driven by a real purpose to introduce sustainable change and drive positive social impact, by increasing the opportunities available to young and disadvantaged people.

What we do

We are recognised by Microsoft as one of the only partners who deliver a range of services across all three Microsoft clouds; Azure, Dynamics 365, and Microsoft 365. Whilst we have hybrid cloud capabilities and skills with AWS and Oracle, our deep relationship with Microsoft has had a strategic influence on our organisation and the services we deliver since the day we were founded. We are experts in transformation and see transformation in three ways; Cloud, Business and Digital.

Cloud Transformation is about tools and technology, often IT-led it focuses on the platform with Azure, and Modern Work through Microsoft 365 services. Cloud Transformation is an enabler and in order to deliver real value, business transformation is required.

Business Transformation is about re-engineering internal services to better serve the business, focusing on business applications, processes and productivity, through Dynamics 365 and the Power Platform.

Digital Transformation relates to external interfaces with clients/citizens/students and enters the domain of disruptive innovation focusing on replacing or complimenting existing services through digital product development.

All three service portfolios span: business and technical consulting, managed services, training & adoption, apprenticeships, and data & AI.

We live by our values of **honesty, openness and trust**, and we embed these values into everything we do, from delivering new and exciting business and technology services/solutions, through to the charity work we regularly undertake within our communities.

Cloud Transformation Services

For the past 15 years we've worked with clients to transform the workplace/workforce with the introduction, adoption and strategic management of Microsoft cloud technologies. Working across all industry sectors, we aim to transform the ways in which people work and organisations deliver services, through the re-imagination of technology and support services, and through the provision of enhanced digital skills training and apprenticeships.

Cloud Platform

We are experts in the configuration and migration of services & applications to the Cloud. We share our skills and experience as an Azure Expert MSP, leveraging our deep Microsoft relationship to deliver innovative solutions that solve real business problems through a range of services covering the entire Azure ecosystem.

Modern Work

We help our clients get the most from their investments in Microsoft 365 through correct licensing, configuration, training and adoption. We take a user-centric approach, shifting attention to connecting people and giving them the tools and knowledge needed to become a truly Modern Workforce.
