RKON™

Modern Workplace Jumpstart

1-Day Workshop

1

Assess current environment and make security recommendations.

Understand current pain points within the organization and what tools are needed to mitigate these challenges.

2

Make recommendations regarding auditing, patching, and overall database management based on current cloud usage.

3

Discuss admin & user training, pilot testing and internal communication plans needed to launch a cohesive solution across the enterprise.

4

Deep dive into possible solutions and next steps.

DELIVERABLES

- Audit of current security cloud posture
- Tips for optimized security in Azure
- Recommendations for implementation
