THE FUTURE OF MODERN BUSINESS IS **CLOUD COMPUTING**

Flexible	**Secure**	**Efficient**	**Scalable**
Azure supports the broadest selection of operating systems, programming languages, frameworks, tools, databases and devices	*You can get enterprise-grade protection, & redundant storage with multiple copies kept to protect against data loss*	*You have a fast, easy path to the cloud, with reduced capital costs, and the ability to scale up or down as needed*	*You can get easy, economical storage in the cloud that can scale on demand and can be accessed anywhere*

WHAT IS YOUR PATH TO THE **CLOUD?**

CLOUD SERVICES

Data Storage Solutions

Backup and Disaster Recovery

Hosted Exchange

Infrastructure as a Service (IaaS) Full or Hybrid

RMON NETWORKS
WE MANAGE I.T.

Microsoft Partner | Silver Small and Midmarket Cloud Solutions Silver Datacenter

Businesses of all sizes face an increasingly competitive environment complicated by advances in big data, social media, and mobile technologies. Do you want to keep your business running smoothly and securely while taking advantage of the best that modern IT can offer? With our deep expertise in cloud solutions we can help you boost efficiencies while driving down risk and cost.

RMON NETWORKS CAN HELP YOU:

- Monitor apps and network performance across the cloud, on-premises infrastructure, and devices

- Grow more efficiently through turnkey management solutions

- Focus on building your business instead of managing network infrastructure

- Meet demands for new capabilities such as video conferencing and other real-time communications

- Scale out quickly and affordably with pay-as-you-go cloud services

- Get the most from your network infrastructure without increasing labor and training costs
