Microsoft Data Protection Solutions

Protect and Govern Your Sensitive Data

Protiviti provides a comprehensive approach to data protection by aligning business needs, compliance requirements, and organizational goals with your data protection program strategy to effectively deploy & optimize Microsoft Purview capabilities.

Microsoft Solutions Partner

Security

Why Protiviti

As a Microsoft Solutions Partner and a Microsoft Security Services Provider, Protiviti leverages Microsoft SCI products and our proven delivery methodology to bring industry focused and deep cyber security subject matter expertise to help our clients solve complex business challenges.

How We Help

- Conduct workshops and proof of concept engagements with Microsoft Purview

- Quantify protection of sensitive data across governance, technology and data scans

- Develop roadmap for optimizing protection capabilities in Microsoft Purview

- Deployment and optimization of Microsoft Compliance & Data Protection capabilities

- Formalized end to end data protection governance

Protiviti's Microsoft Data Protection Solution

Protiviti's data protection and Microsoft Purview subject matter expertise provides clients a unique combination of strategic advice and implementation support within the Microsoft Purview solution. Our proven approach helps clients adopt comprehensive Data Protection from foundational governance to optimized protection capabilities across the organization to strengthen compliance efforts and sensitive data protection.

Data Protection Readiness Assessment

- Cross-functional program alignment
- Implementation roadmap for recommendations and quick-win improvement opportunities
- Technology and Licensing optimization strategy
- Preliminary inventory of data landscape
- Identify unprotected sensitive data

Strategy & Deployment Roadmap

- Preliminary data protection use cases
- Protection rules aligned with business objectives
- Organization-wide data classification schema
- Structured technology rollout plan

Microsoft Deployment and Optimization

- Business alignment with data protection capabilities
- Risk-based data protection mechanisms
- Defined success metrics
- Concise, relevant reporting by stakeholder
- Defined methodology to prioritize activities

Managed Services

- End-to-end program management
- Consistently updated data landscape
- Managed data loss risk
- Automated triage and workflow
- Cost-effective personnel scaling
- Ongoing threat management
