## Are You Ready for the AI Revolution?

Artificial Intelligence (AI) is changing the way we do business. Across all industries, organizations are adopting AI to improve processes, drive new business opportunities and increase competitive advantage. Many organizations, however, are unsure of how to get started with AI, have not yet determined the best use case or opportunity and do not have the right data or resources to successfully implement this technology.

As a Microsoft AI Cloud Solutions Partner and an AI and Machine Learning in Azure Specialist, Protiviti is uniquely qualified to help organizations design and implement AI solutions that leverage Microsoft's AI technologies.

## Three Approaches for Microsoft AI

## Our Microsoft AI Services

Whether you are starting to explore AI, have committed to adopting AI, or have already deployed AI and are concerned about its inherent risks, we can help you realize and sustain meaningful business value. In addition to our consulting services, we have developed over 45 proprietary models that help accelerate your time-to-value for aligned use cases.

# Protiviti's Microsoft AI Services

## Get Started Today:

Our Microsoft-certified offerings provide four unique approaches to move forward on your Microsoft AI journey. Our end-to-end solutions from strategy to implementation, enabling our clients to identify patterns and iteratively tune and improve.

### Generative AI Roadmap

Identify a focused objective for Microsoft AI applications, and quickly develop an actionable perspective on aligned potential for AI across business functions. Build a strategic plan to deploy Microsoft AI capabilities at scale.

### Hack-a-thon

Take a hands-on approach to learning and developing Microsoft AI capabilities. Work side-by-side with AI experts to ideate and build concepts in a time-boxed approach.

### Generative AI Rapid POC

Take ideas further, faster and work smarter by leveraging our proven methodology and knowledgeable team for accelerating ideation to functional prototype.

### Microsoft Copilot Readiness

Focus on expected value delivered with AI-enabled use cases, evaluate your data for accessibility and completeness, and determine which Copilot or AI architecture best aligns to your use cases.

## City National Bank of Florida Optimizes Customer Relationship Value through Innovative Data Approach

### Client Challenge

The bank was not effectively assigning its relationship managers to optimize service, balance resource workloads and maximize revenue. An innovative data-grouping solution was needed to handle account complexities without negatively impacting customers.

### Solution

The project team used Microsoft Azure to develop a graph data structure and associated algorithms to organize and analyze nested banking customer relationships.

### Client Value

The solution reduced daily data processing time by nearly 96%, from 24 hours to one hour. It also automated more than 90% of client relationship management assignments by using a data-driven approach.
