

Protiviti Microsoft Power BI Solutions

Make better business decisions with Microsoft Power BI

Embrace intelligence, data and automation in all its forms to solve your business challenges. Advanced analytics and machine learning provide the insights for data-driven decisions that drive your business forward. We help organizations with information management, data governance and advanced analytics that unlock organizational potential, enabling informed decision making, leveraging your company's most valuable data assets to increase shareholder value.

Using Microsoft Power Platform, we can analyze data, build solutions and automate processes. The Microsoft Power Platform connects Office 365, Dynamics 365, Azure and hundreds of other applications to build end-to-end business solutions. From creating dynamic Power BI Dashboards from data-driven insights to building custom applications in Power Apps and automating processes with Power Automate, our experts can help your organization leverage Microsoft Power Platform, Data and AI to transform your business.

Protiviti Microsoft Power BI Services

Assessment and Strategy

Facilitate discovery sessions with key stakeholders to determine current and future requirements for Power BI. Formulate a plan and roadmap for rolling out power bi guidelines, standards, and processes for leveraging Power BI capabilities to the organization.

Migration, Consolidation and Optimization

Review existing data visualization capabilities developed on legacy or other vendor tools. Define an architecture to best meet the requirements of data analysis, exploration, discovery, modeling, and visualization that exist on existing reporting.

Design and Implementation

Implement the new solution on Microsoft Power BI and plan for successful release of the product within IT and Business users.

On Demand Support

Protiviti's On Demand Services provides your organization with access to a team of certified Microsoft experts on an as-needed basis. We deliver reliable and responsive support services and remediate technical issues in a timely manner.

Protiviti's Microsoft Power BI Solutions

Performance Tuning and Management

- Review the Power BI solutions for proactive solution health management and performance tuning.
- Conduct assessment of existing Power BI program and provide assessment results and recommendations to enhance the existing Power BI performance health

Migration, Consolidation and Optimization

- Define an architecture to best meet the requirements of data analysis, exploration, discovery, modeling, and visualization that exist on existing reporting.
- Review existing data visualization capabilities developed on legacy or other vendor tools

Power BI Embedded

- Get interactive reporting solutions with our Power BI embedded services. This allows you to integrate Power BI reports with your existing systems like CRM, ERP and others

SAP HANA and BW Reporting

- Deep technical expertise in SAP HANA, Data Services and other SAP related products
- Majority of the data modeling occurs in SAP HANA
- Power BI provides two options to connect to SAP HANA, both of which we have significant experience implementing

Advanced and Stream Analytics

- Build pipelines to stream data via APIs to Social Media sites or IoT devices into Azure IoT Hub or Event Hub.
- Enrich data via Azure Cognitive Services, AutoML, or other custom developed ML & AI services and report results through Power BI

Microsoft Power Platform

- Creating storage place in Power BI for storing the data
- Utilizing available templates for triggers, actions, or notifications
- Configure the service
- Check the data and start analyzing

Program Readiness, Stand Up, Governance and Center of Excellence

- Our experts assist you to ensure your databases are always available, secure and configured for future growth, performing regular health checks, performance monitoring and maintenance plan configuration.

Data Protection

- Align organizations data protection standards to MS Information Protection in Power BI
- Create sensitivity labels and apply to Power BI reports, dashboards, datasets, and dataflows to classify sensitive content within your Power BI environment

Office 365 and Power BI

- Leveraging data and insights from your Office Apps in a seamless end-to-end experience
- Maintain data protection throughout Office 365 and Power BI

Data Warehousing and Power BI

- Developing Power BI reports based on cloud-based and on-premises data warehousing solutions (i.e. SQL Server, Azure SQL Database, Azure Synapse, etc.).
- Analyze wide range of datasets from small reports to large enterprise solutions.
