

# Microsoft Azure Well-Architected Review

## Improving Workload Quality and Realizing Success in Microsoft Azure

Businesses are expecting increased agility and reliability through cloud transformation but require management of the new risks adopting cloud solutions can result in. A well-architected framework review evaluates architectural and operating process alignment with business expectations and offers both strategic and tactical areas of improvement.

As a Microsoft Gold Partner, Protiviti is uniquely qualified to execute a Well-Architected Framework Review to broadly assess and understand the multiple dimensions of the Azure environment. Leveraging the Well-Architected Framework, organizations can:

- 1 Review and assess workloads using proven leading practices
- 2 Gain valuable insights to understand your security posture, architectural alignment, expenditures, and opportunities for improvement
- 3 Prioritize where to focus to optimize workloads and core organizational processes

### Protiviti's Well-Architected Framework Pillars

#### Operational Excellence

Efficiently deploy, monitor, and manage your cloud workloads

#### Security, Privacy and Compliance

Maximize security, design for privacy, and align with regulatory requirements

#### Reliability

Design and operate resilient and highly-available workloads in the cloud

#### Cost Optimization

Maximize the business value of your investment in cloud

#### Performance Efficiency

Design and tune your cloud resources for optimal performance and efficiency

#### Sustainability

Address the long-term environmental, economic, and societal impact of business activities

# Protiviti's Microsoft Azure Solutions

No matter where you are on your cloud journey, Protiviti will help your organization harness the power of Microsoft Azure to transform your organization, identify opportunities to gain competitive advantage and improve business efficiency and operations. Our end-to-end services align with defined business outcomes, including cost savings, agility, scalability, innovation, and the strategic use of cloud for IT modernization and digital transformation.

## Advise

- Cloud Strategy, Governance and Skills Readiness
- Well-Architected Framework Review
- Cloud Adoption Journey and Planning
- Remediation Recommendations and Advisory Services

## Secure

- Zero Trust Architecture
- Posture Management
- Security Automation
- Data Protection

## Transform

- Data Modernization
- Architectural Design
- Migration, Modernization and Custom Business Applications
- Cloud Applications

## Manage

- Manage Services Provider
- Cloud Operating Model
- Cloud Optimization
- Capacity and Application Support Services

## Innovate

- Internet of Things (IoT)
- Artificial Intelligence (AI) and Machine Learning (ML)
- Quantum Computing
- Blockchain
