Who is Rockhop?

# Who are we?

We have 30+ years of experience working together in Microsoft professional services where we were first to the cloud

Our deep and wide global network within Microsoft and across the industry allows us to lean on our partners and most skilled experts to deliver innovative and impactful solutions

We are excited about Power Platform because of its truly transformative capabilities, and we measure it. We want to help you achieve results and use this as the compass for everything we do

We like working together and it's core to our culture! We root for each other and for you. You will see proof in the quality of our delivery and our lasting relationships

# Our Values

## **Excellence without Arrogance**

Humility comes naturally to those confident in their abilities. We pause to listen because seeking to understand should always precede seeking to be understood. We embrace the learnings that come from fast failures and slow successes alike.

## **Measurable Results**

If we cannot identify how we will deliver measurable results to any customer or partner, we should not engage. We value and celebrate results, and we take pride in the impact our work delivers.

## **Uncompromising Transparency**

Knowledge is power, and we're more powerful together when we communicate openly. There are no secrets among us, our partners, investors and customers. Sharing is caring, and caring is who we are.

## **A Place We Like**

We embrace diversity, demonstrate empathy, and seek fun in everything we do. It is our belief that "Rockers" will look back on these times as the best of their careers. Surrounded by like-minded people who root for one another. You will never be bored at Rockhop!

# Measurable Business Impact

We believe that we should only engage where, collectively, we have direct line of sight to significant measurable business impact. We begin discussions with the objective of mutually exploring these opportunities. Here are some examples of how we achieve a measurable business impact for our customers.

## Open Business Opportunities

- Enabling "makers" to quickly develop LOB applications
- Increase speed to market for customer facing applications
- Develop applications to engage customers and open new markets

## Reduce Operational Costs

- Reduce licensing/ownership costs
- Improve SLAs
- Automate processes
- Avoid redundancy
- Reduce costs of shadow IT
