AI-Powered Insurance

In the insurance world, it often feels like teams are drowning in a sea of information. There are thousands of files with claims notices, supplemental applications, loss histories, endorsement change emails, police reports, doctor's notes, and countless forms – they're all packed with crucial details, yet they exist as unstructured data, making them incredibly difficult to process efficiently. But what if the secret to smarter risk assessment, deeper claims insight, and true process automation isn't about working harder, but about working smarter? The real game-changer lies in transforming this valuable data into clear, actionable intelligence.

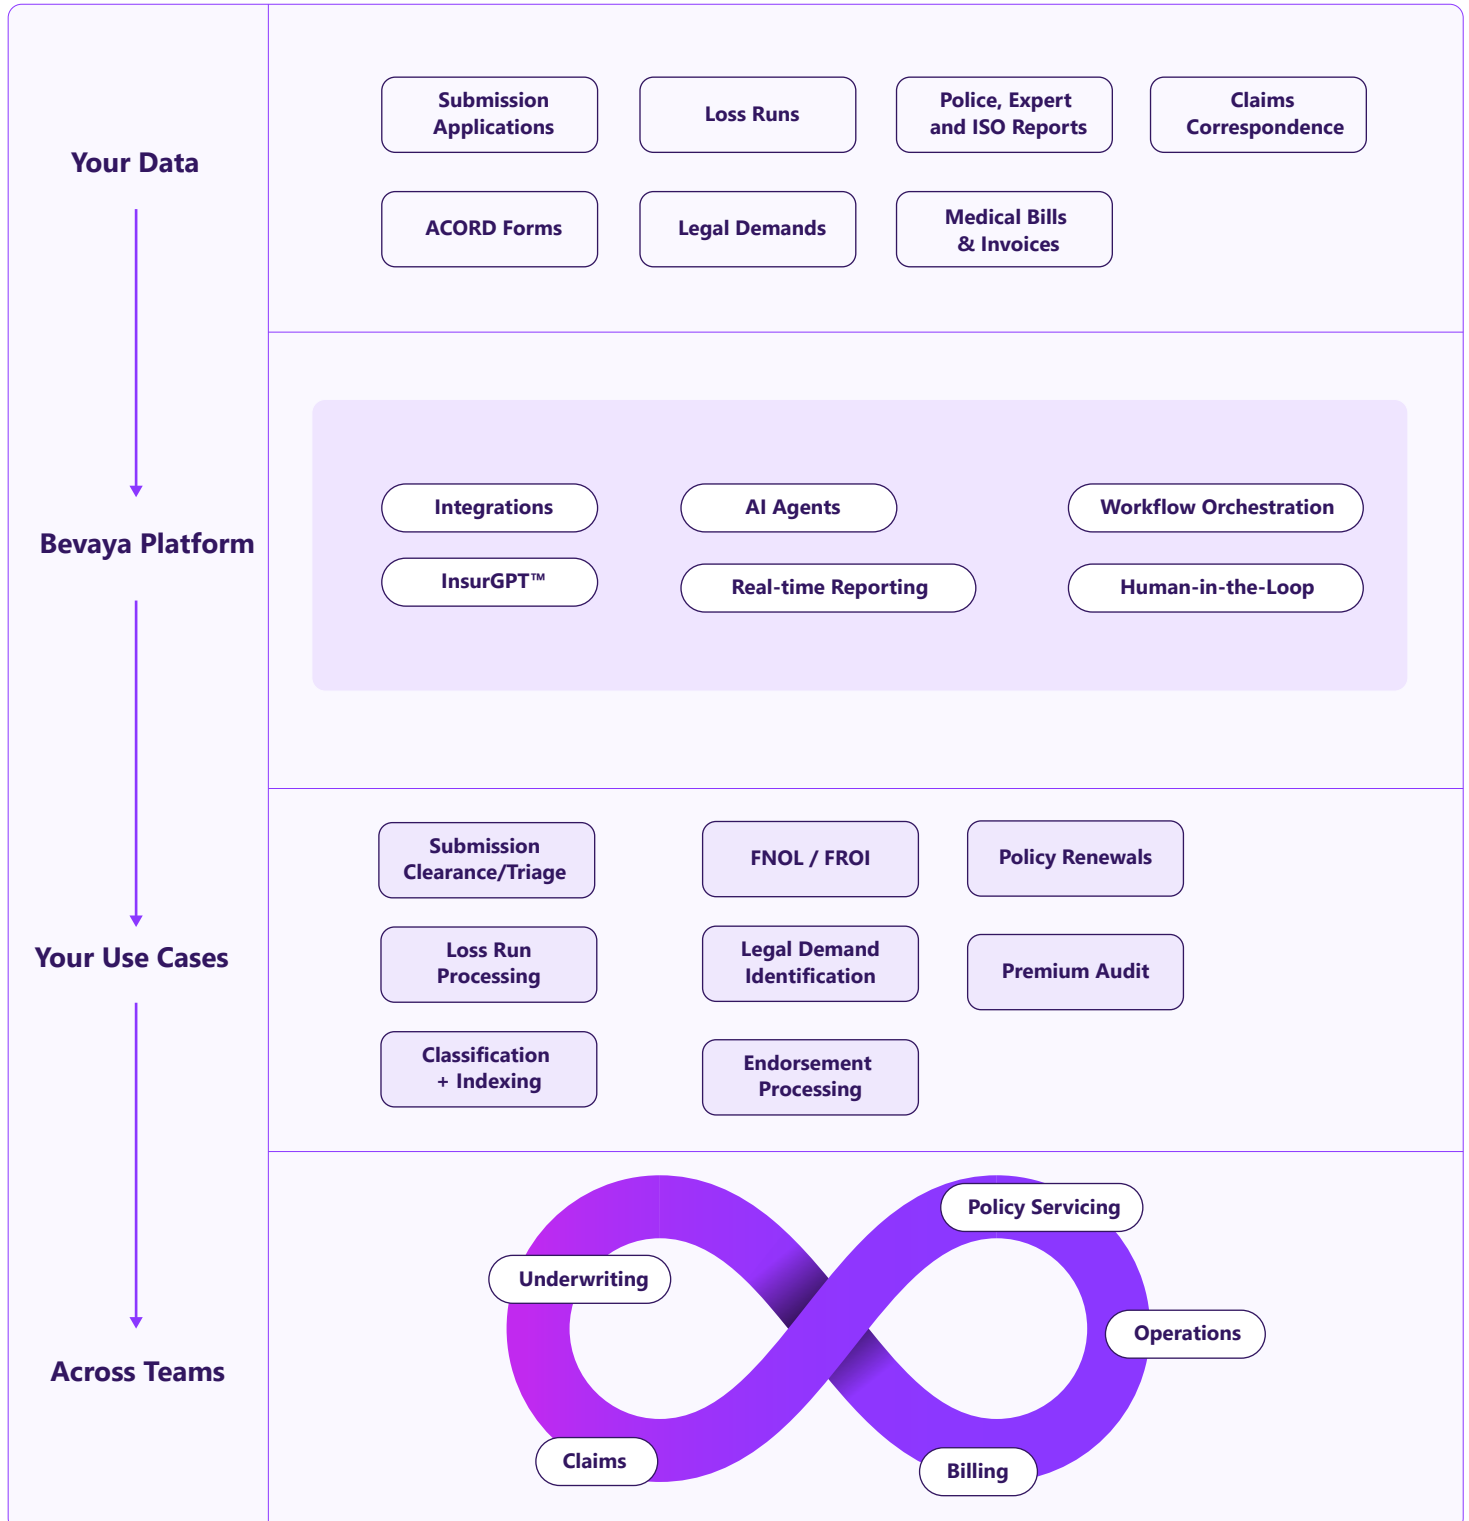

This is where the Bevaya Agentic AI Platform for insurance can help.

Imagine having a team of dedicated AI agents, pre-trained on millions of insurance documents and common processes and **98%+ accuracy** in most use cases

This frees your expert teams from low-value manual tasks to focus on what truly matters: quoting business faster to increase premium revenue, reducing claims leakage with better data access and interpretation, and delighting policyholders through enhanced one-on-one engagement.

Accelerating Innovation Through Alignment

"The benefit of Bevaya's team's experience in and focus on the insurance industry is that we are already speaking the same language. This means we can come to an understanding on the business requirements and objectives quickly in the solution development lifecycle."

Ned Rand,
CEO of ProAssurance Group

AI AGENT

Solutions with the Customer at the Core

"Bevaya showcased their knowledge of the industry, bringing a level of expertise to our discussions that we were simply not getting from other vendors. The Bevaya team critically understood our vision and delivered a customer centric solution. We are very excited about this partnership."

Kurt Bonigut,
CIO of Frontline Insurance
