Project Manufacturing

Businesses that are Project Manufacturers generally employ a large number of engineer and design staff, and have a full manufacturing shop floor equipped with the CNC and other equipment required for their production. Project Manufacturing is a form of Mixed Mode manufacturing, as it involves both Engineer to Order type work as well as production manufacturing.

You are a business with: 5-30 pieces of equipment (or work cells); have a high ratio of engineering to shop employees; sell product almost always modified specifically for your customer's needs; Stock material for use over time; Order some custom material on a job-by-job basis; and both have project managers and production managers. You employee between 20 and 150 people.

Business Central Implementation and Training Prices

Bronze

You are a smaller Project Manufacturer (maybe a small ETO) that has a few basic pieces of manufacturing equipment and makes your own products in a fairly simple way.

You track everything against projects, and need some (but not full) shop floor manufacturing control. You release work orders to basic production and record completion as well as materials used.

This is recommended for smaller (under 20 employee) Project Manufacturers.

$37,500 USD
Fixed Fee Implementation

No significant customizations are supported in Bronze projects. Customers must upgrade to Silver or Gold in those cases. No ISV / 3rd Party Addons will be used.

Silver

You are a mid to small Project Manufacturer with full job shop manufacturing. You make most or all of your own components on your projects.

You track everything against projects, and need robust shop floor manufacturing control with labor barcoding. You release work orders to full production and record completion as well as materials used. You have stock and inventory you need to manage.

This is recommended for smaller (20 to 50 employee) businesses.

$63,500 USD
Fixed Fee Implementation

Minor customizations are supported in Silver projects. Customers must upgrade to Gold for more customization. None or 1 3rd Party Addons might be used.

Gold

You are a mid size Project Manufacturer with extensive job shop manufacturing. You make most or all of your own components on your projects.

You track everything against projects, and need robust shop floor manufacturing control. You want advanced CRM for tracking opportunities and sales cycles. You release work orders to full production and record completion as well as materials used. You have stock and inventory you need to manage.

This is recommended for larger (50-100 employee) businesses.

$89,000 USD
Fixed Fee Implementation

More complex customizations are supported, but the cost of customizations must not exceed 15% of the total cost. 2 or more 3rd Party Addons might be used.

Platinum

You are a small enterprise Project Manufacturer with extensive manufacturing capacity.

You track everything against projects, and need robust shop floor manufacturing control. You want advanced CRM for tracking opportunities and sales cycles. You want barcoded warehouse management for stock. You release work orders to full production and record completion as well as materials used. You want Business Intelligence and KPI dashboards,

This is recommended for larger (100+ employee) businesses.

$118,000 USD
Fixed Fee Implementation

Any degree of customizations are supported. Any number of 3rd Party Addons might be used. On-Site time is limited with most delivery being remote.

Monthly: $120/user per Month during training
Fixed Fee projects require customers also purchase monthly project support during the term of the project for the target number of full users expected to go-live with the system
