

100 Sheldon Drive, Unit 40 | Cambridge, ON | N1R

For the last 20 years, Sabre has been helping manufacturers by offering a fully functional MRP and Accounting solution built on Microsoft Technology. Our technology, and more importantly the approach we take to implementing ERP, is all designed for Small and Medium manufacturers looking to improve on or implement their first ERP.

ABOUT SABRE LIMITED

Sabre Limited was founded in 1998 to help local Ontario manufacturing companies use their ERP more effectively. Our goal from the beginning has been to help small and medium enterprises get more value from their investment in technology. We are focused on long term relationships, where we are about more than just technology – we are about being a partner ready to help you build your business.

PARTNERSHIP WITH MICROSOFT

Sabre has a superb relationship with our principle partner, Microsoft. We have been selected as the Microsoft Dynamics NAV manufacturing “go-to” partner in Ontario – and as such have substantial support from them.

Sabre chose Microsoft for a few simple reasons:

Microsoft invests over 13 Billion dollars annually in technology R&D, and their entry into the mid-size ERP market is rock solid, proven and well established; The Dynamics NAV 2016 product is the 4th generation of Microsoft’s Cloud based ERP offerings; It is well established in the manufacturing sector; It has over 100,000 worldwide implementations in every type of business; There are hundreds of companies writing add-on solutions for it.

If you are a manufacturing company looking at an ERP – we recommend Dynamics NAV 2016 and in many cases Microsoft Dynamics CRM 2016 as well.

If you already use Microsoft Dynamics ERP in a manufacturing environment (especially GP and NAV) and would like to discuss opportunities for Sabre to help you, please don’t hesitate to call us!
