

Your net zero ambitions and initiatives should be data driven from day one

ABOUT DATA FOR SUSTAINABILITY BY SAEGUS :

By combining carbon expertise, technological excellence and business experience, Saegus is a partner of choice to help you industrialize emissions calculation and monitoring using MS Azure unique capabilities.

See what customers are saying:

"Saegus has been a partner of choice for our data driven ESG initiatives from day one. They perfectly filled the gap between our ESG and data teams in order to remove all the obstacles that had prevented us from scaling and industrializing our carbon digital trackers."

– MPS, Carbon Program Manager, Cosmetics

WHAT WE OFFER

Because climate change has to be taken seriously, we teamed up with climate experts partners in order to guarantee our solutions excellence and stay up to date with the quickly evolving regulations and calculation norms.

Use the power of Azure cloud to build and automate your emissions data platform and make it accessible to businesses, develop Power BI analytics uses to take data-driven decisions, design and industrialize artificial intelligence models on Azure ML to help you simulate or forecast emissions related to complex activities are the daily lives of our experts.

Whether you want to embark on a first project in experimentation mode or build the emissions digital cockpit of your worldwide activities, we can support you whatever your maturity and ambitions are.

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
