

Embed Health, Safety and Well-Being into the DNA of your Business.

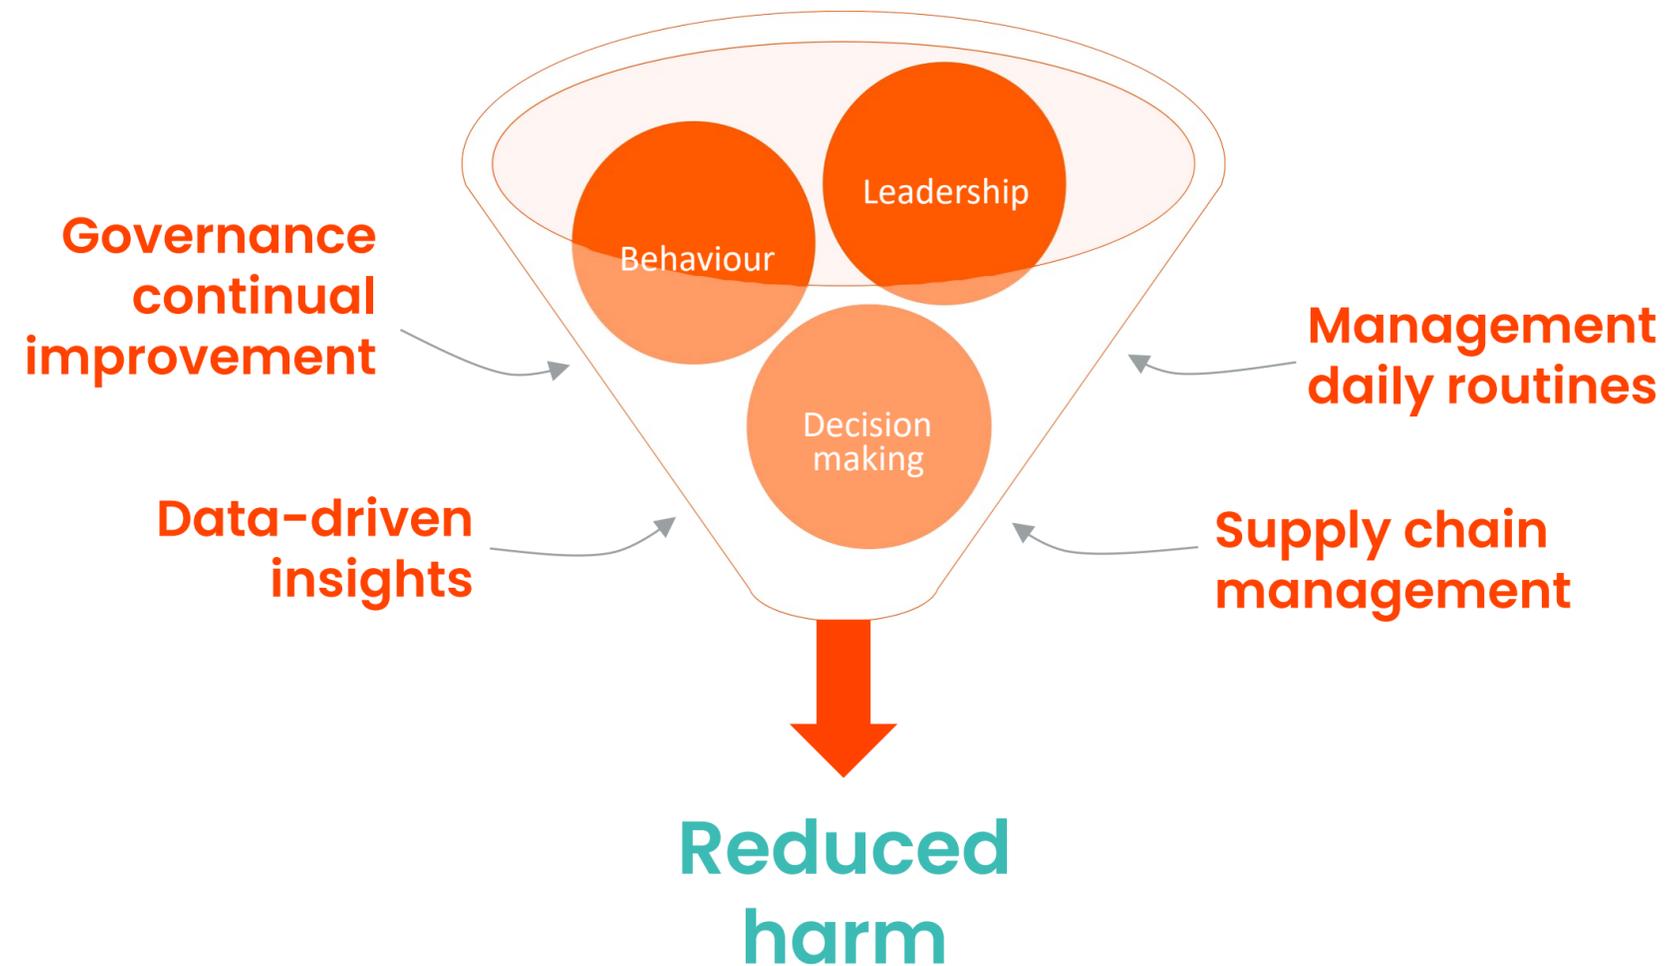

safe365[®]
INTELLIGENT HEALTH & SAFETY

Digital Brochure

Making an impact on your people and your business.

Safe365 reduces harm by stimulating stronger leadership, behaviours & decision making for our clients.

Your return on investment in partnering with Safe365:

- Demonstrable ESG impact – workers returning home safely each day, moving beyond compliance to moral & ethical approach to work health, safety & well being.
- Positive culture change through worker engagement, employment brand benefit (attraction & retention).
- Stronger commercial performance – quality, efficiency improvements through digitisation and process alignment/controls
- Better productivity with workforce spending more days at work creating value.
- Reduced claims, employer liability premium assurance
- Improved legal compliance posture. Reduced risk of regulatory exposure, fines, imprisonment, reputational & financial losses

We are a great partner, driven by a bold vision and purpose.

safe365[®]
INTELLIGENT HEALTH & SAFETY

“ Our purpose is to provide innovative, world class digital tools that support businesses to improve their work health, safety & well being leadership and performance.

Nathan Hight, Safe365 Co-Founder

The Problem

75% of businesses do not have adequate health and safety capability to meet basic legal compliance obligations. This exposes the entire business, its directors & management, and puts their staff at risk.

Costly & complex

Serviced by expensive consultants that in many cases are not delivering value to customers.

Current tech is old, overengineered based on dated approaches to risk management, are expensive and narrow in thinking. Too complicated & too expensive.

Legal requirements

Regulatory minimum standards are increasing globally. All developed nations have regulatory requirements for employers to manage the risk of harm to workers. Doing nothing is no longer viable. Rising ESG standards across the supply chain.

Talent gap

There is a global shortage of high-quality health & safety professionals.

All major risk and health & safety associations have identified a lack of supply of professionals with the expertise required to support the global business community.

Serious consequences

Human harm and the associated social and economic impact. Regulatory harm from fines and imprisonment. Commercial harm from reputational damage, loss of talent, mandatory shutdown periods and lost productivity and revenue.

Safe365: Your digital health & safety ecosystem

Tapping into the power of data to save lives and strengthen business performance. Aware, enabled and effective health and safety performance with Safe365.

- ✓ Protected stakeholders
- ✓ Engaged workers
- ✓ Improved business performance

Platform
As A Service

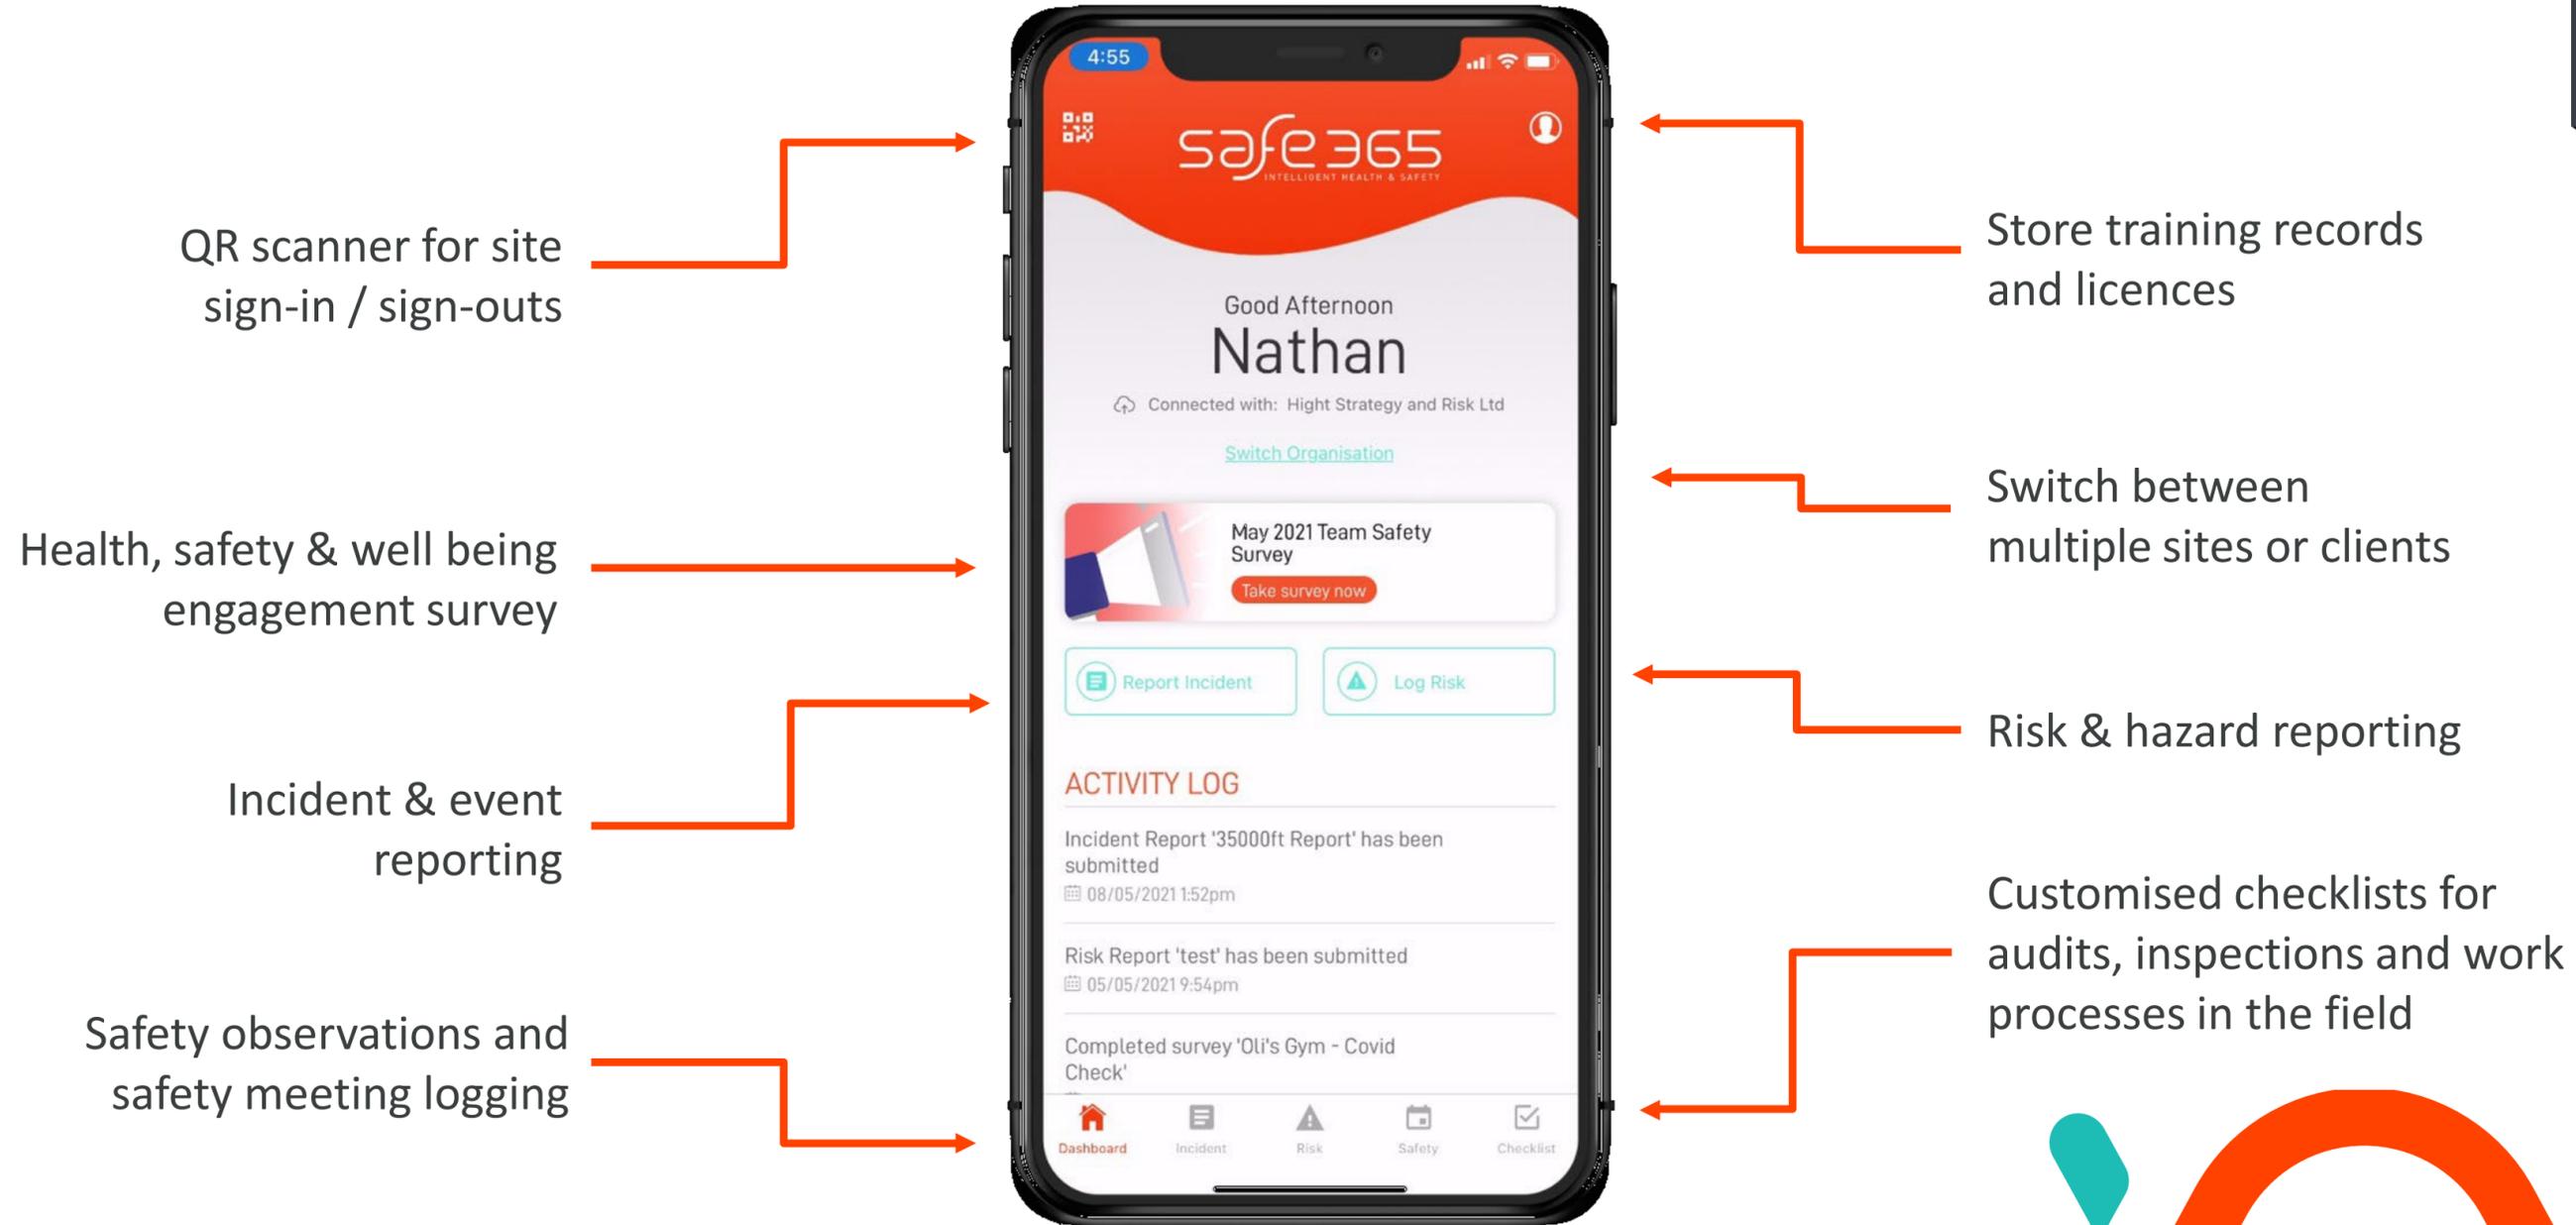

The Solution: Safety maturity profiling, governance & continual improvement

- Safety maturity self-assessment that results in your business safety index with dashboard view detailing areas of strengths and areas for continual improvement focus.
- Can be used by all business areas to assess health & safety capability and maturity.
- Use across business units / sites and aggregate for board reporting and visibility.
- Can be used between to support supply chain visibility / management & overlapping responsibilities.
- Business intelligence that informs decision making & improves safety leadership.

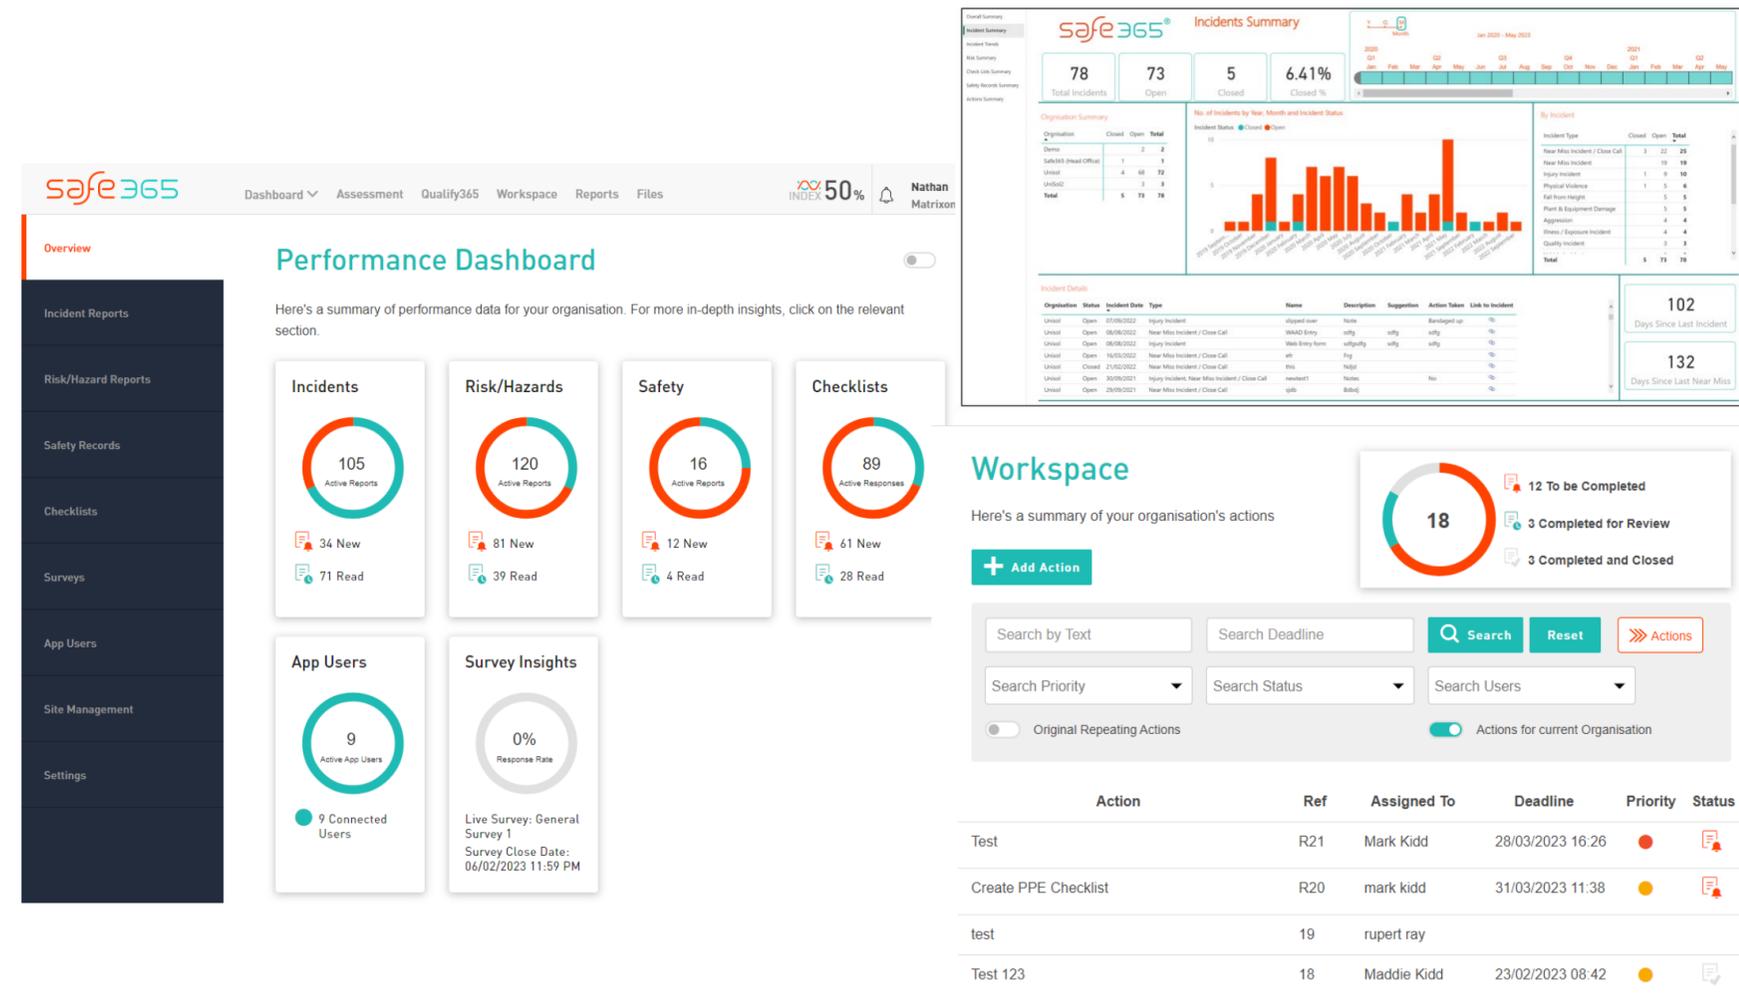

The Solution: Safety reporting, team engagement and safe daily routines via the Safe365 app.

The Solution: Timely notifications, workflow management and deep insights.

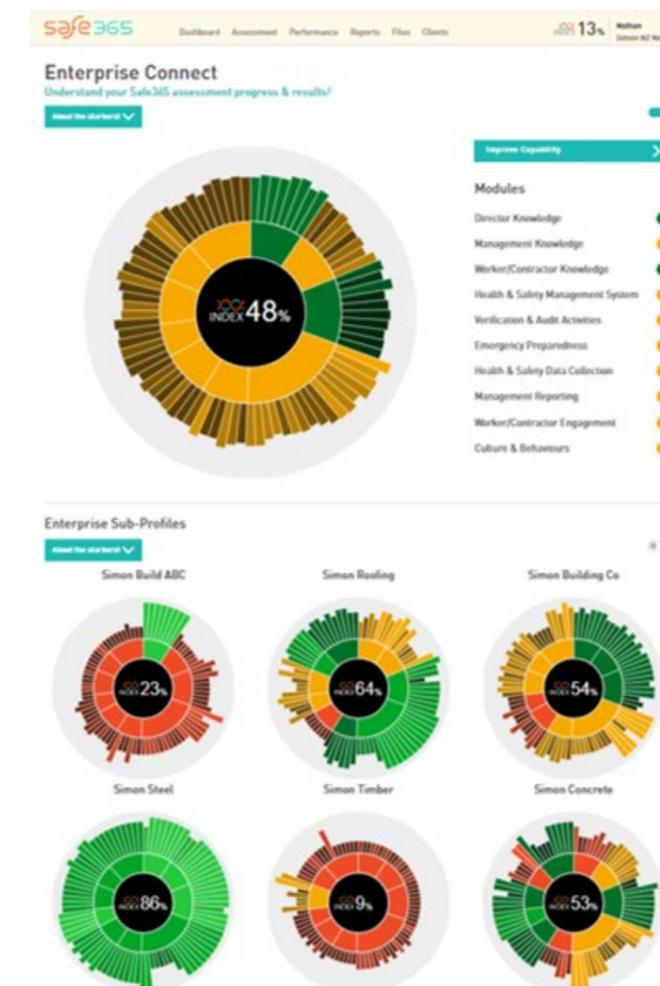

- **Real-time notifications.** Ensure the right people know exactly what is going on in a timely manner, ensuring triaging of data and appropriate management intervention.
- **Create, assign and track corrective actions.** Ensure critical tasks that protect your people and your business are managed by assigned team members through to close-out.
- **Communicate and consult with your team.** Set up and deploy staff surveys to get feedback on important issues to your people.
- **Powerful insights that will drive action in your organisation.** Extract deep insights from your data to identify trends to drive action. Provide key personnel with high quality, professional reports that allow effective decisions to be made.

The Solution: Enterprise Connect

For organisations wanting to enhance safety and risk leadership, improved decision making, improved legal compliance and generate safer behaviours across the business.

- **Streamlines continual improvement processes.** Having multiple Safe365 maturity assessment profiles supporting different parts of the business while all being aggregated and presented on one, fully integrated user interface makes it easy to see the systemic gaps to focus your WHS strategy.
- **Visibility, awareness & transparency for C-suite & Board.** Better informed Boards and C-Suites are able to engage in the due diligence process more effectively. Enterprise Connect helps these stakeholders understand the WHS strengths and challenges facing the organisation making it easier for WHS professionals to gain support and buy in for critical initiatives.
- **WHS performance monitoring and accountability within each site, business unit, franchise or division.** Set KPI's and targets for management for WHS maturity improvement and provide the tools for improvements to be realised.
- **Powerful insights that will drive action in your organisation.**

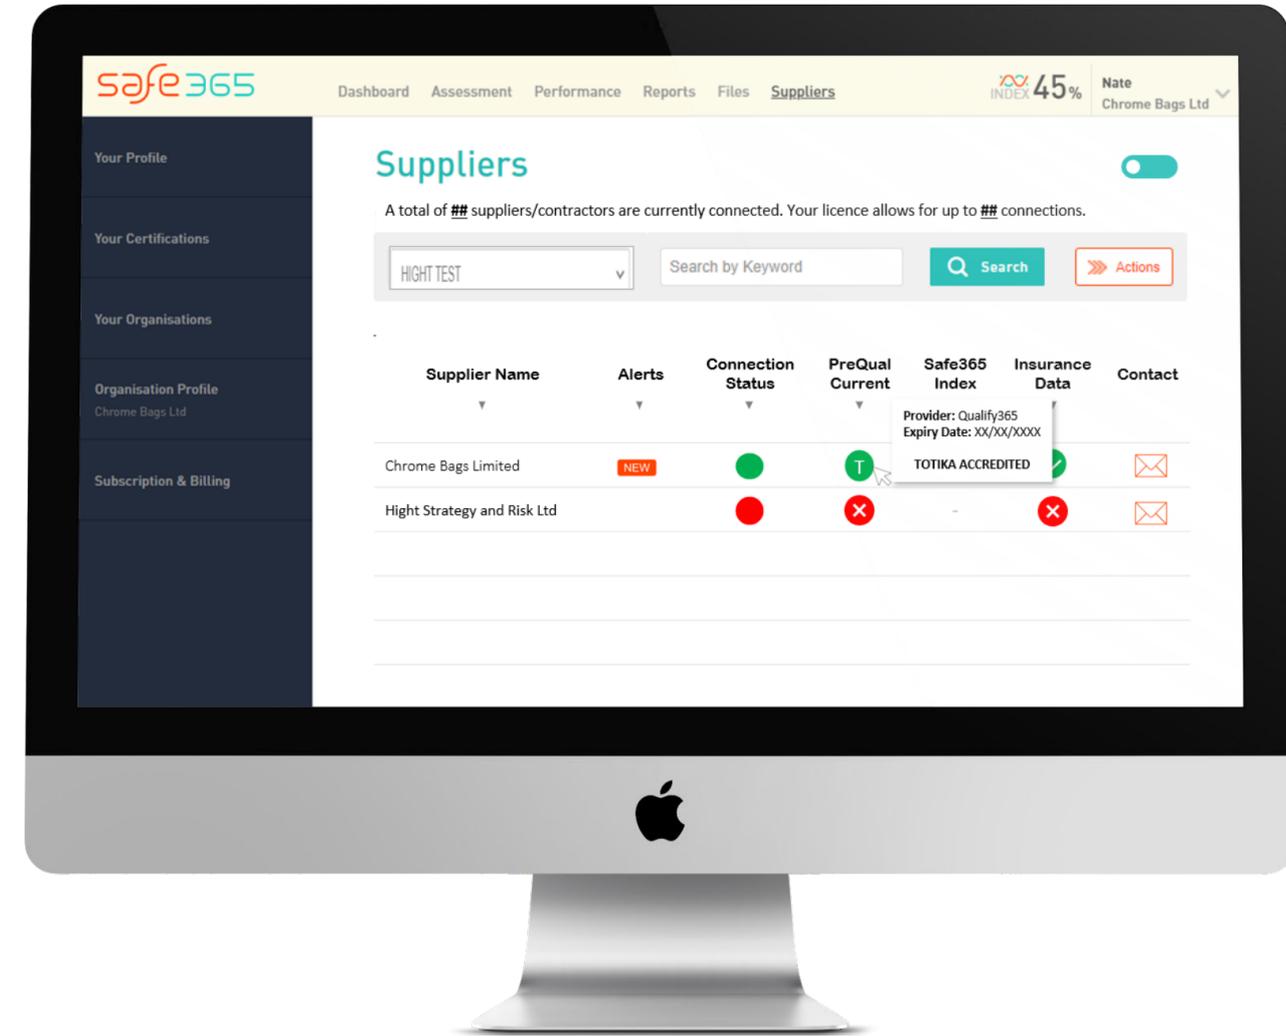

The Solution: Contractor Connect

For supply chain owners wanting to enhance safety and risk leadership, improved decision making, improved legal compliance and generate safer behaviours across the supply chain.

- **Streamlines supply chain management processes.** Simply share a link with suppliers and Safe365 Contractor Connect takes care of the rest. Contractors are prompted to create a business profile, upload all documentation required
- **Real-time, up to date, contractor insights & transparency.** Access the latest documentation and health and safety practice compliance by contractor any time. View their pre-qualification, safety maturity status, insurance documents, health and safety training dates and see what is missing or out of date at a glance.
- **Improves compliance and due diligence around contractors' H&S practices.** With a digital handshake creating a contract between both parties at a given date, the Safe365 Contractor Connect portal provides 24/7 visibility, collaboration and accountability around the agreed expectations.

The Solution: Platform as a Service

For large organisations, peak bodies and associations that love the Safe365 user experience but want to create their own SaaS product to measure and improve any aspect of business performance.

- Streamlines continual improvement processes. Visibility, awareness & transparency for C-suite & Board. Capability monitoring, benchmarking and accountability within each site, business unit, franchise, member organisation or division. Powerful insights that will drive action in your organisation.
- Bring your subject matter expertise to life on our intuitive, easy to use platform. We provide an implementation package & methodology that supports you from concept to go-live.
- Take a huge amount of time, cost and risk out of your product development journey with a Safe365 PaaS solution.
- Ideal for:
 - Insurance and financial institutions to measure non-financial indicators across client businesses.
 - Sporting, professional or industry associations seeking to measure, benchmark and improve capability across member entities.
 - Government agencies seeking to provide digital tools to end user businesses to support business improvement / capability building.

Competitive Advantage

Why is the Safe365 platform superior vs. existing alternatives in the market?

Attractive & engaging

Safe365 has a philosophy that using safety tech should be fun for users. With deep care given to the user experience and interface, Safe365 stands out with its vibrancy, colour, energy and simplicity. Fun leads to deeper engagement, better data and better decisions.

Connectivity with C-suite

Safe365 is consumable for Executive teams & Boards. The innovative micro learning throughout the platform enables business leaders to increase awareness and enable them to be diligent, ensuring the business is meeting its obligations. Health & safety managers have better engagement with C-suite and Board as a result of using Safe365.

Low cost / high value

With global economic challenges and a rising tide of regulatory and moral obligation, businesses need a cost-effective solution that helps them manage risk, reduce exposure, increase productivity and stand out as an attractive employer.

Benchmarking data

Millions of data points that can be put to work to support clients with world class benchmarking data, ensuring time, money and energy is invested where it can make the greatest impact.
