

# Automate Power BI Reports Workflow: Export and share instantly

Save time, eliminate errors, and scale reporting effortlessly with SAGE Distribution Engine for Power BI.

SAGE Distribution Engine for Power BI streamlines the process to distribute Power BI reports across pre-defined user groups through a governed framework, optimizing delivery cadence and efficiency. It enables scheduled or event-driven exports of reports in multiple formats (e.g., PDF, Excel, PPT) and securely publishes them to cloud-based platforms such as SharePoint. The tool also automates distribution by delivering reports as email attachments or via collaboration channels, ensuring timely and accurate dissemination. By eliminating manual processes, it enhances operational efficiency, minimizes human error, and scales effortlessly to meet enterprise demands.

## Why you need SAGE Distribution Engine for Power BI ?

### Seamless Automation & Scalability

Manage all report distribution via an intuitive scheduling interface with centralized control, which support seamless business scalability.

### Secured Framework

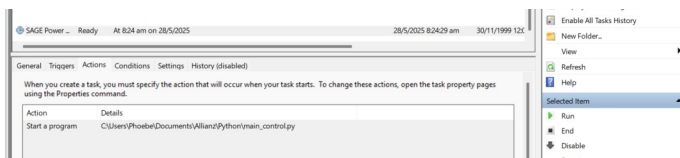

Enable comprehensive secured framework by controlling the access to sensitive data and resources. This ensures only authorized users can read the confidential data.

### Real-Time Error Alerts

Get notified of task failures in order to quickly resolve issues. Log is available to traceback on the error message.

## Explore SAGE Distribution Engine for Power BI features

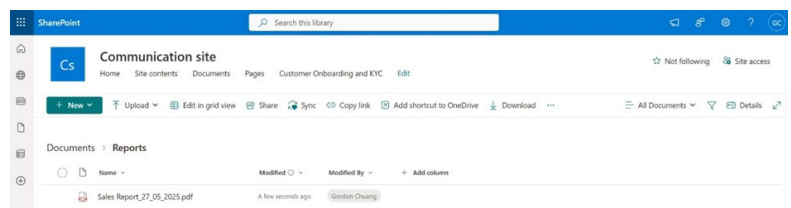

### Scheduling Automation
