To Whom It May Concern

RE: Recommendation Letter: Salt Essential

The above subject refers.

Welwitchia Health Training Centre is an accredited Higher Education Institutions in Namibia with a heavy demand for IT Support to deliver both its contact and online services. To achieve this end, WHTC have overtime received both technical and training support services from Salt Essential IT through facilitation of various Microsoft 365 Applications from project implementation, rollout and after service support.

We are confident that through the services rendered by Salt Essentials, our institution migrated from the traditional paper workflows to digital, while our staff members are now able to access, manage, collaborate, and command MS Teams and MS 365 applications. The services which Salt Essentials continues to render, remain core to our mandate and we do not hesitate to recommend their services.

For any further information and testimonial, do not hesitate to contact our Head of ICT, Valerie Garises, garisesv@welwitchia.com.na, +264811247400.

Yours sincerely,

Prof. S.N Ipinge
RECTOR & CHIEF EXECUTIVE OFFICER
