

A seamless virtual campus platform to transform your institution into an EdTech

OmniLearn LMS is a blended learning platform that enables a transition from offline to online virtual learning while combining a fine blend of instructor-led and self-paced learning for the adult education sector, schools, universities & IHLs, and corporate workforce learning.

OmniLearn LMS delivers e-learning by supporting a myriad of content formats and types along with the ability to assess learners through individual and group assignments, across formative & summative assessments.

What is OmniLearn LMS?

OmniLearn LMS is a learning management solution that combines instructor-led and self-paced learning to deliver a fine blend of synchronous & asynchronous virtual learning campus, while integrated with OmniMentor for hyper-personalized mentoring to all learners; thereby delivering blended learning pedagogy at scale.

Why customers use OmniLearn LMS?

OmniLearn LMS is a comprehensive learning management platform wherein the organization can set up its courses for structured or unstructured learning and offer it to a wide range of learner audiences – students at K-12 & HigherEds, Professionals & Corporate workforce.

It helps to formulate the learning assessments with self-paced learning progress; while providing real-time interactions and a course-based content map.

Learners

- Facilitates self-paced learning for learners.
- Supports e-learning of a myriad of content formats and types.
- Facilitates guided & structured learning to stay on track.
- Ease of access to learning evaluation and outcomes.
- Access to learning content anywhere, any time.

Educational Institutions

- Create blended learning pedagogy and deliver it seamlessly.
- Single repository of course content and assessments.
- Comprehensive learning progress tracking of cohort & learners.
- Integrates seamlessly into customer's learning environment.
- Ease of management of end-2-end learning delivery.

Employers

- Skills based learning transformation of workforce
- Modular approach of delivering micro-learning.
- Monitor employee's competency skills acquisition.
- Gain real-time learning progress of employees.
- Extend partner courses seamlessly through LTI.

Minimalistic changes; iterative rollouts; scalable

BCG DIGITAL ACADEMY was selected by Skills Future Singapore, a statutory board under the Ministry of Education (MOE), to deliver a re-skilling program for 1500 displaced professionals. They needed an LMS platform that was not just robust and flexible to minimize changes but also scalable across users and iterative rollouts, as the number of cohorts and adult learners increased to 1500 gradually over time. There was also a need to have a fine blend of asynchronous & synchronous online learning while learning modules were introduced on a dynamic basis. OmniLearn LMS was a perfect fit for the needs.
