Qlik to Fabric & Power BI Migration: 3 Weeks POC

Demonstrate proof of migration from Qlik to Fabric & Power BI, including validating functionalities, features compatibility and UI/UX, using our proprietary Migrate to Fabric Solution.

Migrate one of your Qlik applications to Power BI, in order to:

- Prove the application can be migrated and acceptable to end users

- Validate same functionality is available in Power BI

- Understand compatibility and feature gaps

- How to handle incompatible features between Qlik and Power BI

- Understand migration process and skills required to migrate the application

- Utilization of Power BI tools for building Power BI semantic model

- Demonstrate the enhanced UI/UX of Power BI

- Ability to use migrated application for user acceptance

Along with our expertise in Power BI, we have over 10 years of experience in Qlik. We are one of the leading Migration Specialists with a proven record for delivering effective results on time. Our methodology & processes enable us to deliver quality and consistency. Our POC process includes usage of our proprietary Migrate2Fabric™ offering to enable data driven decisions, an improvement over a manual approach.

Agenda:

- Install & run Metadata Analyzer™ tool within customer Qlik environment

- Review Analyzer results with key stakeholders

- Study the identified application for migration*

- Perform gap analysis & prepare a migration roadmap

- Leverage metadata collected from Power BI Metadata Analyzer™ tool

- Design and develop Power BI report

- Review Power BI Report

- Demonstrate proof of migration, validate functionalities, features compatibility, UI/UX

 *This offer is based on a Qlik Application of low complexity and up to 3 pages. Depending on the scope and context of the project, duration and cost would vary.
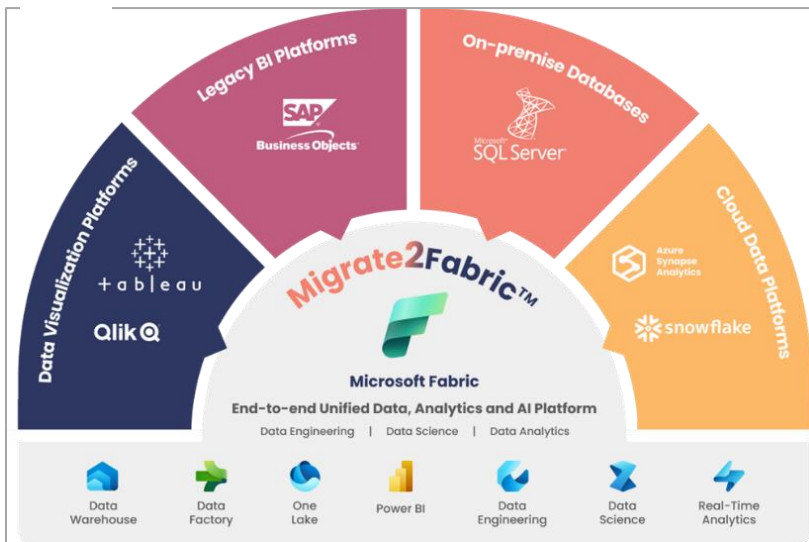

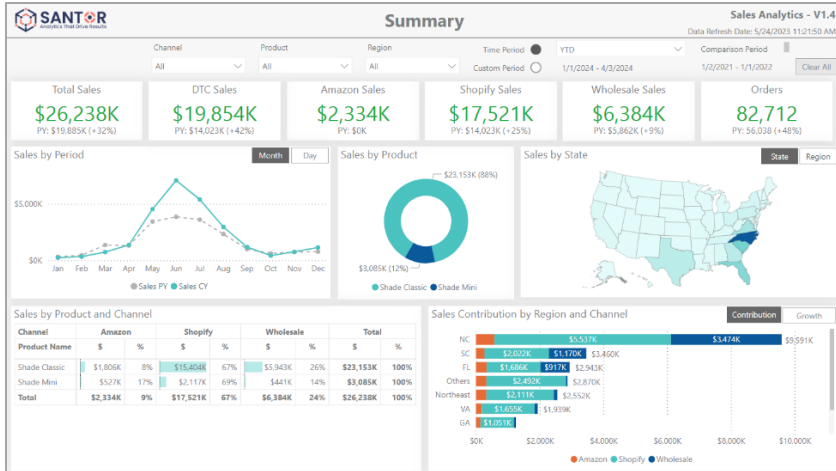

Deliverables:

- Power BI Report

- Demonstration Workshop

Pricing: $18,000

The Migrate2Fabric™ Difference

Expertise in Fabric
Deep Understanding and experience in migrating to Fabric and Power BI.

Tailored Migration Strategy
Customized plans to meet specific business requirements and objectives.

Comprehensive Service
From initial assessment to full development and optimization.

Customer Value Highlights

Streamlined Migration

Experience a simplified transition with our efficient and tested methodology, ensuring a smooth migration process.

Faster Time to-Value

Quickly benefit from Fabric and Power BI's capabilities, using our tailored acceleration processes that minimize downtime.

Enhanced User Experience

Benefit from improved performance and user experience with our optimization tools, templates, and custom visualizations.

Cost-Efficient Delivery

Take advantage of our global delivery model to reduce migration costs without sacrificing quality or efficiency.

Quick Adoption

Enjoy reduced migration time and higher user adoption rates, ensuring your team quickly adapts to and leverages the new platform efficiency.
