USE YOUR DATA TO YOUR ADVANTAGE

SANTOR
Analytics That Drive Results

Santor helps businesses unlock the full potential of their data by leveraging the modern capabilities of **Microsoft Fabric**, enabling seamless integration, advanced analytics, and AI-driven insights.

Data & AI Problems We Solve

Decrease Complexity
Simplify data management and reporting processes by consolidating tools and workflows within the Microsoft ecosystem.

Centralize Business Logic
Enhance consistency and reduce data silos by maintaining a single source of truth for business logic across all analytics.

Consolidate Licensing
Streamline costs and administration by unifying software licenses under Microsoft's comprehensive suite of services.

Leverage SaaS/Cloud Platform
Transition from on-premises solutions to cloud-based platforms, taking advantage of robust and scalable SaaS offerings.

Seamless AI Enablement
Easily incorporate advanced AI capabilities, such as Azure Machine Learning & Copilots, into your analytics to derive deeper insights and enhance decision-making.

Microsoft Suite Integration
Integrate seamlessly with Microsoft applications to enhance productivity and collaboration across your organization.

How We Solve Them

Using Microsoft Fabric, we help customers overcome data and AI challenges by unifying their data, unlocking insights and intelligence to drive results.

Migrate2Fabric™
Our Migrate2Fabric solution ensures smooth, efficient migration to Fabric and Power BI from other data visualization and BI platforms or on-premise databases. Leveraging our deep expertise and close partnership with Microsoft, we guarantee a cost-effective, secure, and seamless experience.

FabricAdvisor™
Not sure if Fabric is right for you or where to start? Our certified expert consultants evaluate your current data and analytics environment and provide in-depth strategic guidance tailored to your specific needs for efficient Microsoft Fabric implementation.

Data Platform Services
We create scalable, secure, and efficient data platforms by building a solid foundation for your data strategy, integrating data lakehouse architectures, data engineering practices, and data warehousing solutions powered by Microsoft Fabric.

Copilot & AI Solutions
Are you ready for AI-driven insights? Harness the power of AI to optimize your operations. Our Copilot & AI solutions empower businesses to automate processes, gain valuable insights, and unlock new efficiencies - all supported by our extensive expertise in data management.

Expertise for Your Data & AI Needs

Why choose Santor Technologies?
We are uniquely specialized in data migration and AI solutions with a proven track record of success.

Microsoft Solutions Partner
Data & AI   Azure
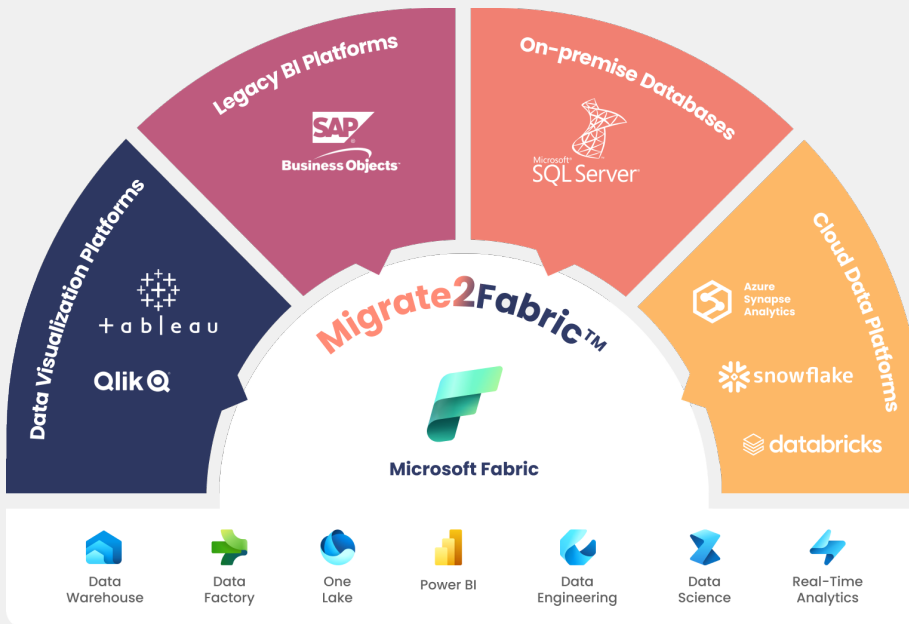

Fabric Featured Partner

Team of 300+ Experts

Proven Track Record
50+ Migrations
150+ Data Analytics Projects

Migrate2Fabric™

Your Gateway to Modern Platform for Data, Analytics, and AI

Make Fabric your everything platform. We make it easy: Migrate2Fabric™ reduces migration time and costs by ~30%, leveraging our Migration Accelerators and Fabric Certified Resources to ensure a fast, secure transition to a modern platform.

SANTOR
Analytics That Drive Results

Migrate2Fabric™ semicircle diagram: Data Visualization Platforms (tableau, Qlik), Legacy BI Platforms (SAP Business Objects), On-premise Databases (Microsoft SQL Server), Cloud Data Platforms (Azure Synapse Analytics, snowflake, databricks) surrounding Microsoft Fabric. Below: Data Warehouse, Data Factory, One Lake, Power BI, Data Engineering, Data Science, Real-Time Analytics

Customer Value Highlights

| Streamlined Migration | Faster Time to-Value | Enhanced User Experience | Cost-Efficient Delivery | Quick Adoption |

FabricAdvisor™

Evaluate your current data and analytics environment and implement customized recommendations for efficient Microsoft Fabric implementation.

Activities
Assess current data and reporting environment, analyze scalability, review licensing, security, and reporting, and provide improvement recommendations.

Deliverables
Assessment report, implementation roadmap, licensing plan, training & support plan, productivity processes, security & governance recommendations.

Customer Benefits
Expert data analysis, tailored implementation guidance, enhanced security & governance, improved reporting, strategic support, and ongoing training.

The Client Experience

"The Santor team developed outstanding sales and marketing dashboards for our organization, uniting disparate data sources and enhancing our decision-making with timely, comprehensive insights."

– Head of Operations, Outdoor Omnichannel Consumer Brand

"Your expertise in implementing Azure Analytics and Power BI dashboards has been instrumental in elevating our data reporting capabilities, providing us with the agility to act on performance metrics and boost our operational efficiency."

– CTO, Leading Engineering Services Company

"Migration to the new analytics platform has enhanced our data insights and reporting efficiency, empowering users with self service capabilities for informed business decisions."

– BI Manager, Premier Household Consumer Goods Company

Get in Touch

You're not just migrating to a new BI platform, you're investing in a strategic transformation leading to quicker, cost- effective, and more insightful data analysis capabilities.
