Tableau to Fabric & Power BI Migration- Assessment

Data driven decision making for Tableau to Fabric & Power BI Migration Assessment using our proprietary Migrate to Fabric Solution. The key challenges in Tableau to Power BI migrations are cost justification and risk assessment.

Along with our expertise in Fabric and Power BI, Santor has deep experience in Tableau. With our extensive experience in Tableau migrations, we have developed a proprietary tool Metadata Analyzer for assessment of migration readiness.

A successful assessment must begin by addressing the following critical areas:

- Understand the Tableau footprint
- Review the current frequency and patterns of dashboard usage
- Acquire metrics for assessing the readiness of individual Tableau assets for conversion
- Select a pilot workbook and develop a tailored migration roadmap

Metadata Analyzer—designed specifically to evaluate migration readiness from Tableau environments. It helps you to:

- Assess your Tableau environment holistically
- Understand dashboard complexity, usage patterns, and compatibility
- Rationalize and prioritize Tableau workbooks for migration
- Create a comprehensive migration plan with effort estimates

Key Benefits:

- A 360-degree view of all Tableau assets from a migration readiness perspective
- A unified profile of key parameters—such as data sources, dashboards, and workbooks—to guide migration decisions

Santor's proven approach ensures a low-risk, insight-driven migration from Tableau to Microsoft Fabric and Power BI.

The actual pricing and duration for this engagement will be customized based on scope and requirements determined during initial consultation.

AI Enablement Roadmap

Thought Leaders in the Microsoft Ecosystem

We actively engage with the Data & AI community to stay at the forefront of innovation, continuously align with industry trends, and share learnings with our clients in real-time.

Thought Leadership & Community Sharing

- Host monthly technical webinars
- Publish blogs highlighting industry insights
- Deliver weekly newsletters to share real-world experiences, best practices, and evolving perspectives

Training & User Enablement

- Provide customized training courses on data engineering, data science and business intelligence
- Conduct Fabric Analyst In A Day Workshops in partnership with Microsoft

Active Participation at Industry Events

- Regularly attend key conferences such as Microsoft FabCon and NRF to stay ahead of innovation in Data & AI

Ongoing Collaboration

- Engage with Microsoft thought leaders, product teams, and partners to inform our solutions with the latest trends and roadmap insights.
