Migrate to Microsoft Fabric and Power BI

Migrate to Fabric is a specialized service offering developed by Santor for organizations who are planning to migrate their current Data & Analytics platform to Fabric & Power BI. With our deep expertise in Fabric, we perform an in-depth analysis for your existing Data & BI environment, formulate a holistic migration plan, and establish an AI ready data platform with advanced Power BI analytics capabilities.

Phases:

Assessment

We start by understanding your current analytics landscape — reviewing existing systems, data models, and governance practices. This step ensures we have a clear view of your environment before defining the roadmap for transformation.

1. Discover

In this phase, we collaborate with key stakeholders to uncover data challenges, identify opportunities, and align on strategic goals. We also evaluate data maturity, team skill sets, and overall readiness for a successful Microsoft Fabric adoption.

2. Gap Analysis

Next, we analyze your existing applications, data flows, and security frameworks to pinpoint gaps and potential risks. This allows us to identify what needs to change to meet both technical and business requirements.

3. Migration Approach

Based on the findings, we design a migration strategy that prioritizes use cases, estimates effort, and outlines a phased roadmap. This plan ensures business continuity and accelerates time to value.

Migration

1. **Plan:** Prepare the detailed architecture, set up governance, and finalize the project plan for your Fabric implementation.
2. **Migrate:** Using our accelerators and automation, establish data pipelines, transform data, and configure semantic models. Applications are modernized

with intuitive navigation and visual experiences, leveraging Power BI and Microsoft Fabric components.

3. **Validate:** Rigorously test data accuracy, system performance, and usability, ensuring your solution meets both business and technical standards.
4. **Optimize:** Reports and dashboards are fine-tuned for speed and scalability, and best practices are implemented for security and efficiency.
5. **Deploy:** Roll out the solution to your users, ensuring smooth adoption. Enable CI/CD processes to support ongoing enhancements and deliver training so your teams can fully harness the power of Microsoft Fabric.

Deliverables

- *Assessment*
 - Assessment Report with Migration Roadmap
 - Data migration plan and architecture
 - Application migration plan and architecture
- *Migration:*
 - Finalized requirements document for migration of applications
 - Detailed project plan with milestones and timelines
 - Development of Power BI Reports
 - Test results and Production release sign-off
 - Production roll-out of migrated Reports
 - Knowledge Transfer documents

The actual pricing and duration for this engagement will be customized based on scope and requirements determined during initial consultation.

Why Santor?

- 150+ Data Analytics and Migration Projects
- 50+ Microsoft Certified Professionals
- Proprietary Migration Accelerators and Processes

Take advantage of this opportunity to explore how Santor's proven expertise can support your transition to a modern data platform with advanced analytics capabilities.

Pricing: Starting at \$45,000

Migrate to Fabric *Your Gateway to a Modern Platform for Data, Analytics, and AI*

Migrate to Fabric is a specialized offering for organizations that are planning to migrate their current Data and Analytics platform to Fabric.

Benefits

- Perform an in-depth analysis of your existing environment
- Formulate a holistic migration plan
- Establish an innovative data platform with advanced Power BI analytics capabilities
- ~30% Reduction in Migration Time/ Cost
- Implement Best Practices
- Maximize User Adoption

Thought Leaders in the Microsoft Ecosystem

We actively engage with the Data & AI community to stay at the forefront of innovation, continuously align with industry trends, and share learnings with our clients in real-time.

Thought Leadership & Community Sharing

- Host monthly technical webinars
- Publish blogs highlighting industry insights
- Deliver weekly newsletters to share real-world experiences, best practices, and evolving perspectives

Training & User Enablement

- Provide customized training courses on data engineering, data science and business intelligence
- Conduct Fabric Analyst In A Day Workshops in partnership with Microsoft

Active Participation at Industry Events

- Regularly attend key conferences such as Microsoft FabCon and NRF to stay ahead of innovation in Data & AI

Ongoing Collaboration

- Engage with Microsoft thought leaders, product teams, and partners to inform our solutions with the latest trends and roadmap insights.
