Microsoft Fabric Administrator Training - 1 Day

Santor is offering a 1-day training for organizations looking to administer, secure, and optimize Microsoft Fabric within their enterprise environment. This training provides in-depth technical instruction for IT administrators and platform owners responsible for the governance, configuration, and deployment of Fabric.

What to Expect?

During this 1-day training engagement, Santor's certified Trainer will cover:

Module 1:

Introduction

- High Review of all areas
- Policy requirements with Entra Security Groups
- Managing access policies

Module 2:

Microsoft 365 Integration

- Admin setting
- Audit logs
- Users

Workspace Security

- Row level security
- Sharing Data
- Reviewing Tenant Workspaces

Azure Integration

- Monitoring Azure spend
- Understanding Bursting
- Restricting Access

Capacity settings

- How to monitor
- Fabric App

Tenant Settings Part 1

- Understanding Fabric elements
- Help and support settings
- Custom Branding

Module 3

Domain Security

- Understanding Data Mesh Architecture
- Admin settings
- Monitoring and Managing Domains

Workloads

- Describing the use and purpose of workloads
- Security settings for workloads
- Incorporating workloads in the organization

Tennant Settings

- Domain management
- Information protection
- Export and Sharing
- Discovery and App Settings
- Integration Settings

Azure Data Access Security

- Incorporating Azure Security inside of Fabric
- Shortcuts and Mirroring
- External security elements

CI/CD in Azure Devops

- Configuring DevOps
- Managing Releases
- Development Pipelines

Data Refresh elements

- Gateway management
- Organizing Data Refresh

Why choose Santor?

- Microsoft MVPs and Microsoft Certified Trainers with real-world implementation experience.
- Hosts Microsoft-partnered workshops like Fabric Analyst in a Day (FAIAD)
- Delivers monthly webinars, blog content, and other insights as an active thought leader

Take this opportunity to leverage Santor's Microsoft Fabric expertise to empower your technical teams with the knowledge to confidently administer, govern, and secure your enterprise data platform.

Estimated Pricing: $3,000
