

# Azure Stack HCI Workshop

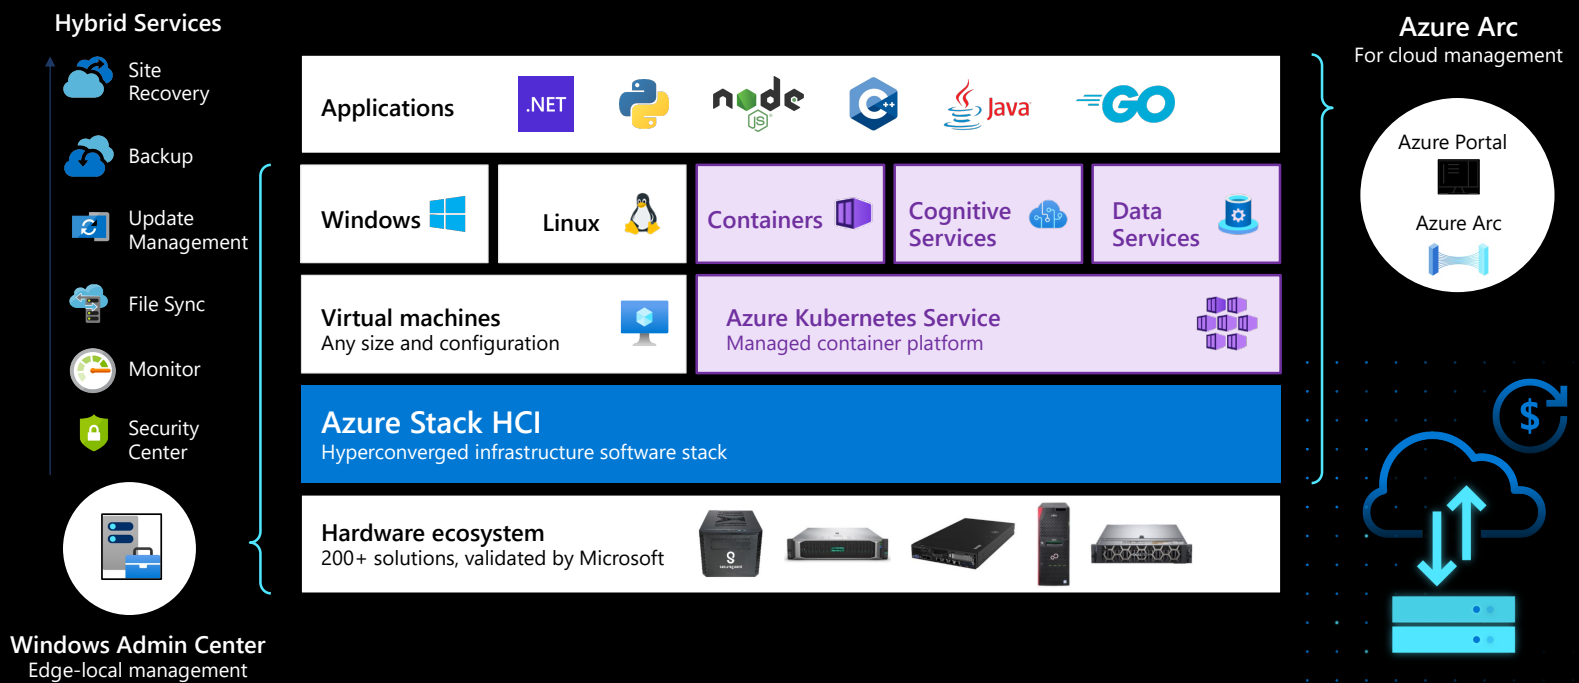

Keep data on-premises and easily connect to cloud hybrid services

Learn about the new hyper-converged infrastructure (HCI) operating system delivered as an Azure service and explore possible hybrid cloud usage case studies.

We aim to familiarize you with Azure Stack HCI, understand the functionality and how it can be applied to your environment. Azure Stack HCI is a hyper-converged infrastructure (HCI) cluster solution that hosts virtualized Windows and Linux workloads and their storage in a hybrid environment that combines on-premises infrastructure with Azure cloud services.

Understand the Azure Stack HCI offering and the associated features, functionality and benefits. How you can take advantage of Azure's broad suite of native services to modernize your IT services..

## Why Saportif Technology?

At Saportif, we provide cloud implementation services and enterprise custom software solutions for organizations looking to harness the power of the Microsoft Cloud.

We assist organizations with their journey to the cloud through our customized process of Assessment, Planning, Migration, Implementation, and Support.

- Modernize and secure your datacenter
- Affordably run intelligent edge and remote branch solutions
- Industry-best performance for managed SQL Server
- Deploy cloud native apps and Azure Arc enables services
