ACCELERATE YOUR CLOUD SECURITY WITH MICROSOFT DEFENDER AND SENTINEL.

UPLIFT YOUR SECURITY POSTURE IN 4 WEEKS!

Satalyst's Microsoft Cloud Security Accelerator package is designed to strengthen your security quickly, to enable you to monitor and manage security events effectively.

Satalyst, part of Canon Business Services ANZ, provides a speedy security uplift package that utilises Microsoft Defender for Cloud and Microsoft Sentinel as a Security Incident and Event Management (SIEM) platform, coupled with Security Orchestration Automated Response (SOAR) in your Cloud environment.

4 week implementation

$39,600
ex GST
(180 hours x $220)
Includes PM

BENEFITS

Consistently evaluate your security stance, protect your resources, and address potential security incidents effectively.

Gain a comprehensive view of your hybrid cloud security status, including visibility of threats targeting your workloads and services.

An integrated security solution that encompasses management of your security posture and detection of advanced threats, along with incident management throughout your organisations digital landscape.

OUR APPROACH

Our integrated cloud security solution with Defender for Cloud and Microsoft Sentinel follows a three-phased approach in under 4 weeks:

+ **Kick-off & discovery:** We align with your business and technical objectives, assess your current Azure environment, identify virtual machines and data sources that need to be onboarded.

+ **Implementation:** We design, configure, and deploy Defender for Cloud and Microsoft Sentinel in your Azure tenant, according to your requirements and best practices. We also set up alerts, notifications, and playbooks to automate your security operations and response.

+ **Handover:** We support you through testing, documentation, issue resolution, and provide recommendations for further improvements.

Our approach ensures that you get the most out of Defender for Cloud and Microsoft Sentinel.
