

# MICROSOFT SENTINEL SECURITY CONSULTING SERVICE

## OVERVIEW

The deployment of Microsoft Sentinel aims to enhance security promptly allowing you to efficiently oversee and handle security incidents.

With the increasing complexity and sophistication of cyberattacks, organisations need a comprehensive and proactive security solution that can protect their data and assets across multiple environments. Canon Business Services ANZ offers a Microsoft Sentinel implementation service that leverages the power of cloud-native technology and artificial intelligence to provide unparalleled visibility, detection, and response capabilities.

Microsoft Sentinel is a scalable and cost-effective solution that collects and analyses data from various sources, including Microsoft 365, Azure, and third-party providers, to identify threats and anomalies in real time. It also enables automated workflows and actions to respond to incidents and mitigate risks, saving time and resources for your security team.

### By implementing Microsoft Sentinel, you can benefit from:

A faster and easier deployment process.

A lower and predictable cost model.

A smarter and more efficient security operation. Reduced false positives, prioritised alerts and actionable insights.

A flexible and customisable security solution.

A more secure and compliant environment.

A scalable and cost-effective solution.

A comprehensive and unified view of threats in your environment.

## FEATURES

Fully integrated with Azure and does not require any hardware or infrastructure maintenance.

Uses advanced analytics and machine learning.

Supports industry standards and regulations, such as ISO 27001, GDPR, PCI DSS, and HIPAA.

Collects and analyses data from various sources across your organisation, including Microsoft 365, Azure, and third-party solutions.

Charges only for the data ingested and analysed, and not for the storage or compute resources used.

Leverages the power and flexibility of Azure cloud, eliminating the need for hardware and maintenance costs.

## OUR APPROACH

Our implementation of Microsoft Sentinel follows a three-phased approach:

- + **Phase 1:** Assess and Design. We analyse your current environment, identify data sources and use cases for Microsoft Sentinel, and design a customised solution that meets your needs and objectives.
- + **Phase 2:** Deploy and Configure. We deploy Microsoft Sentinel in your Azure subscription, connect Microsoft data sources, configure rules and alerts, and enable advanced features such as threat intelligence, user and entity behaviour analytics, and automated playbooks.
- + **Phase 3:** Operate and Optimise. We provide ongoing support and management of Microsoft Sentinel, ensuring its optimal performance and alignment with your security strategy. We also monitor and respond to incidents, provide reports, insights, and recommend improvements.

## ABOUT CBS

A leading Microsoft Partner specialising in cloud, security, and data, CBS has over a decade of expertise in delivering innovative cloud solutions to Australian businesses.

As one of Australia's most highly accredited Cybersecurity services organisations, we know what's required to safeguard your organisation today.

Our teams have deep experience & working knowledge of the following requirements and standards - APRA CPS234, ASD ISM, ISO27001, NIST, PCI-DSS and SOC 2, among others. We are proud to hold the following specialisation and membership.

## DON'T LET CYBERTHREATS COMPROMISE YOUR ORGANISATION'S PERFORMANCE AND REPUTATION.

Contact us today and find out how we can help you implement Microsoft Sentinel and enhance your security posture.
