# simplifying **Power BI for Multi tenancy**

Discover the Ultimate Solution for Power BI: Satori PBI Multitenant

Enjoy a universe where the complexities of deploying and managing your embedded Power BI dashboards are seamlessly taken care of.

With Satori PBI Multitenant, you can finally focus on building your Power BI reports without the added stress of deployment and management intricacies

This software adds an unprecedented layer of security, access control, and multi-tenancy to augment your Power BI experience.

Environment Segmentation:
Separate production, testing, and development environments for efficient management for each customer.

Authentication and Authorization:
Manage login, password, users, roles, and page access effortlessly.

Customization:
Tailor themes, menus, and page layouts to match each customer's branding and preferences.

Scheduled Data Updates:
Automate data refreshes based on predefined schedules.

Viewer Management:
Control viewer settings and access permissions seamlessly.

Access Reporting:
Monitor and report on user access for compliance and auditing purposes.
