

# Microsoft Fabric Kickstart

Are you ready to take your data management to the next level? Our Microsoft Fabric Kickstart Program is designed to do just that in a short span of 2-4 weeks.

## Why

A solid data platform is the backbone of modern organizations. It enables efficient data management which is crucial for informed decision-making, strategic planning and harnessing the power of artificial intelligence.

## What

We run a 2-4 week program, including:

- We'll help you connect and integrate one (or more) existing data sources with OneLake in Microsoft Fabric.
- Our team of experts will analyze your specific needs and recommend a robust and scalable Fabric architecture that's tailor-made for your business.
- To ensure you can see the benefits firsthand, we'll set up a proof of concept with one of your data sources in Microsoft Fabric. This will allow you to understand the potential impact and efficiency of Microsoft Fabric in your data ecosystem.

### Associated technologies

- Microsoft Fabric
- OneLake
- Power BI
- Microsoft 365
- Azure AI
- Azure Entra ID
- Microsoft Purview
- Azure Data Factory
- Microsoft Fabric Copilot
- Azure Synapse
- Data Activator

### BUSINESS CHALLENGES

Centralizing all your business data in one place with governance and security.

### VALUE DELIVERED

A state of the art data warehouse, based on Microsoft Fabric to power your business insights and AI capabilities.

### HOW WE DO IT

We analyze your data estate, connect the different data sources, clean up your data and bring it all together on the Microsoft Fabric platform.

## How

We run a 2-4 week program during which we set up a POC with Microsoft Fabric.

## Outcome

A proof of concept for Microsoft Fabric, linking one (or more data sources) and a recommendation for a future proof Fabric architecture.
