Velosio®

01: Pre-Flight Assessment

Analyze your VMware infrastructure and workload requirements to recommend the most suitable cloud solutions adhering to Microsoft's Well-Architected Framework (WAF) and Cloud Adoption Framework (CAF), utilizing our in-depth toolkit and proficiency, all within the context of Azure VMware Solution (AVS).

What to expect:
- Workshops to educate key stakeholders
- Data center scan to capture everything from sizing, performance, and security requirements
- Assessment of your workload(s) through the lenses of reliability, cost management, operational excellence, security, and performance efficiency using best-practice tools

Workshop Options:
- Azure Cloud Overview
- Identity & Access Management
- Security & Compliance
- Alerting & Monitoring
- Cost Management

Deliverables:
- Migration Readiness Report
- Proposed Azure Spend
- Cost Analysis

Velosio®

02: Launch Plan

Plan for your Lift Off with a robust analysis of assessment results to produce a **reliable**, **optimized**, and **cost-effective** Launch Plan into the cloud.

What to expect:
- Establishment of goals and success criteria
- Review of current workloads and utilization
- Application and server dependency mapping
- Formation of desired timeline based on business needs

Deliverables:
- Launch Plan & Timeline
- User Acceptance Testing criteria defined

03: Go, No Go

Review, adjust and approve the Launch Plan with key stake holders to align with business needs.

What to expect:
- Discuss & Review Launch Plan w/ Key Stake Holders
- Countdown to liftoff...

Velosio®

04: Lift Off

Take off into the cloud with the execution of your Cloud Adoption Framework (CAF) aligned Launch Plan. Build, validate and migrate your way from on-premises to the cloud.

What to expect:

- Implementation of Azure Landing Zone
- Consultation around Backup & Recovery Options
- Discussion of Alerting & Monitoring Options
- Pilot Migration
- Final Migration & Cutover

05: Touch Down

Seamlessly transition from on-premises to the cloud with our expert support. We will equip you with the tools and resources to successfully manage your new cloud workflows and infrastructure.

What to expect:

- Technical handoff to your support team
- Overview of cost tracking tools

Deliverables:

- Platform Documentation
- Adoption Toolkit
- User Acceptance Test Results

Velosio®

06: Engine Maintenance

Velosio's years of experience with business applications translate to a deep bench of tenured team members with competency across Cloud, ERP and CRM. Velosio Cloud Services covers a range of services to manage your cloud solution post Lift Off.

Common Post Migration Add-Ons:
- Infrastructure Alerting & Monitoring
- Anti-Virus Protection
- Operating System Patching
- Identity Management
- Azure Network Management
- Backup of Servers and/or Databases
- Integration with Azure Arc

Additional Services:
- Multi-factor Authentication
- Disaster Recovery
- High-Availability
- Encryption Services
- ERP & CRM Solutions

Optional Deliverables:
- Monthly patch report
- User audit reports
- Cloud spend report
- Performance dashboards
