

ScaleDynamics

Global & fully managed multi-cloud computing platform

We are the most advanced multi-cloud computing resource platform on the market, providing an unmatched choice of cloud providers, instant resource configuration, accelerated deployment and activity monitoring.

Production-grade cloud management is now **simple**

Forget about server management, provisioning, deployment and monitoring.

Multi-cloud made easy

Choose cloud resources from multi-regions and capacities, from best-in-class providers and provision it in a few clicks.

Migrate anywhere you need, anytime

Migrate in a few clicks without traffic interruption nor redeploying.

About ScaleDynamics

Breton technology company, founded in 2008 by french entrepreneur Gilbert Cabillic who previously sold to Google. After 8 years at Google, he founded ScaleDynamics on the foundation to deliver a new generation of managed cloud computing platform, simple, multi-cloud with maximum scalability.

A full solution to solve **cloud problems**

Time & effort to go into **production** is high

Provision new cloud computing resources and deploy live into production in just a few clicks, improving the release cycle.

Managing **multi-cloud** is complicated

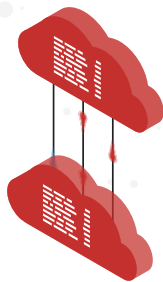

ScaleDynamics provides a layer of abstraction that manages this complexity for you. Provision and managed the clouds of your choice in a few clicks, from a single platform.

Migration from a **cloud provider** to another takes too much time

Migrate computing resources from one cloud provider to another in a few clicks. Enjoy unprecedented freedom to compare and migrate whenever it suits your needs.

In a few clicks, move workloads to where you need them, scale processing power, change geographical area, lower costs, etc.

Let's keep in touch!
