

### **Simplify LiDAR Processing with Our SaaS Solution**

Upload building interior point clouds and receive classified data with up to 30 classes—no expertise required! Pay-as-you-go with our flexible credit system. Powered by Azure, our platform ensures secure processing, with data visible only to you. Collaborate seamlessly with partners using our 3D viewer, share insights, and download results easily. Use our Revit plugin to seamlessly open and edit point clouds in Revit, or request a detailed BIM model from our team.
