

AI Pathfinder

Are you on track for AI adoption?

The SCC AI Pathfinder is a comprehensive evaluation designed to show you how to get ready for successful AI implementation. We'll help you explore the potential integration and application of AI within your organisation.

By the end of this engagement, you'll have a better understanding of the feasibility of leveraging AI technologies to enhance efficiency, innovation, and decision-making processes in your organisation.

Whether you're just starting to build out your AI strategy, or you're ready to explore a specific use case, our expert skills and resources will help you on the path to successful AI integration.

Why use an AI Pathfinder?

Advanced Expertise

Tap into our team of highly trained experts with a broad range of data & AI skills to create the right solution for your business.

Informed Decision-Making

Gain comprehensive insights to make informed choices about your AI strategy.

Tailored Recommendations

Receive a personalised roadmap designed to optimise your AI strategy.

Future-Ready Solutions

Ensure your organisation is equipped with a scalable, secure, and efficient AI solution that aligns with long-term goals.

Time To Value

Ensure your organisation is equipped with a scalable, secure, and efficient AI solution that aligns with long-term goals.

AI Pathfinder

How it works

Our expert team will assess what you need to do to get ready for AI implementation within your organisation. We'll provide education around the different types of AI and ML, as well as guidance on responsible AI and the potential risks. We can also offer feedback and next steps on what to investigate next. This process typically takes 2 weeks to complete.

As part of this engagement, we will:

- ✓ Gain an understanding of your current IT operations and capability
- ✓ Review your current challenges and experience using AI
- ✓ Provide an overview of what AI is and what's possible to achieve using it
- ✓ Provide a demonstration of Gen AI, highlighting the capabilities, concepts, and practical implications of its use
- ✓ Educate your team on how to apply the different types of AI
- ✓ Describe responsible AI and the risks of not using it correctly
- ✓ Assess where you are on your AI journey, including recommendations on how to move forward.

Who's it suitable for?

This service is ideal for organisations that:

- Are looking to automate complex, repetitive tasks and processes within your organisation using AI
- Have a specific use case or problem in your organisation that you believe could be solved with AI?
- Are interested in predictive analytics and want to leverage AI for forecasting and decision making
- Are prepared to invest in AI, including potential changes to existing processes, systems, and potentially upskilling staff
- Are aware of the benefits of generative AI and what to understand more

Next steps:

Speak to our experts to about our Data & AI Accelerator, designed to understand the solution's operational impact on your organisation and make sure users get the best experience possible.

AI Pathfinder

What's in it for you?

Fast results

Pathfinders are delivered in weeks, not months, helping you realise value from AI rapidly.

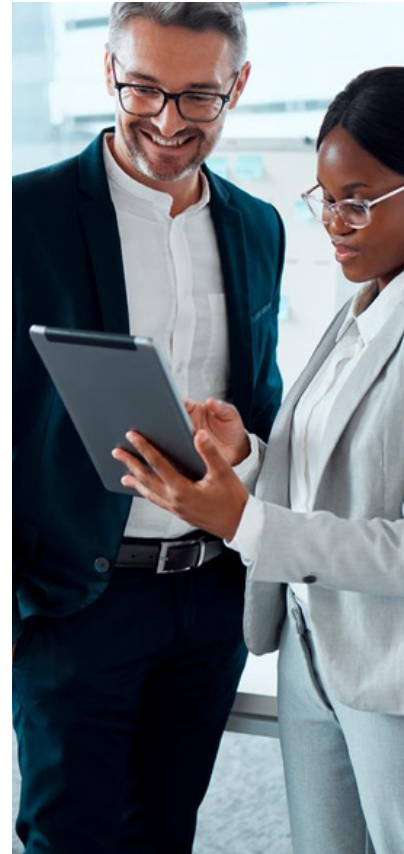

Exec ready insights

We'll help you with cost-benefit analysis that you can take straight to the board room.

Technical roadmap

We'll help get your AI project underway and overcome any obstacles with a clear vision of how to execute your strategy.
