

# Managed XDR

## See More, React Faster And Stay Protected

Our MXDR service goes beyond traditional security approaches, offering a complete solution designed for today's complex threat landscape. Combining advanced rapid detection and threat hunting, and expert human analysis, we provide increased visibility and integrated protection across your entire digital infrastructure. This approach enables you to react faster, stay ahead of attackers, and strengthen your cybersecurity posture.

### Our Security Operations Centre

**100%**

Visibility of your environment

**<30secs**

Incidents contained within 30 seconds

**99.9%**

False positives removed

**75%**

Faster response

**24/7/365**

Threat coverage

**60%**

Reduction in Mean Time to Respond

**SOC FOOTPRINT**

### What's in it for me?

#### 24/7/365 Security Operations Centre (SOC)

We detect, analyse, and neutralise threats in real time.

#### Digital Defence Team

Cyber experts deliver proactive protection, incident response, and strategic guidance.

#### Proactive Threat Hunting

Continuous threat hunting to reduce dwell time across your estate.

#### Integrated Threat Intelligence

Real-time threat intelligence feeds and contextual insights to stay ahead of emerging threats.

#### Security Automation

Automated workflows and playbooks speed up detection, triage, and response.

#### AI Agent & Human Analysts

Combined AI and human analysis delivers rapid and accurate threat detection and response.

# Managed XDR

## Your Digital Defence Team

Acting as an extension of your business, we get you onboarded, reduce risk, and deliver measurable returns on your cybersecurity investment. With a blend of SOC analysts, technical architects, and threat experts, we help you build a more resilient, responsive security operation that continuously evolves with your strategic goals.

## Cyber Defence Centre

## How It Works?

SCC's MXDR solution offers continuous cyber defence with expert-led monitoring available 24/7, combined with advanced automation and AI.

The Cyber Defence Centre conducts threat hunting, incident response, and service reporting. Meanwhile, our AI agent enhances detection and response through automated triage, threat intelligence, and AI-driven decision-making.

A flexible ingestion layer allows for seamless integration of various data sources, ensuring comprehensive visibility and swift action.

## Why SCC?

At SCC, we blend reliability, expertise, and partnership to deliver tailored cybersecurity solutions that evolve with your organisation. Our approach embeds security as a culture - empowering teams to move faster and more confidently. With expert guidance and proactive support, we help remove barriers, accelerate outcomes, and integrate security across people, processes, and technology.
