

# Data Fabric Accelerator

## Make data central to your business

In today's landscape of distributed data, organisations struggle to manage data trapped in siloes, leading to inefficiencies, missed opportunities, and compliance risks.

As part of our Data Fabric Accelerator, we'll build a unified platform using Microsoft Fabric that allows you to collect, integrate and prepare data from varied sources while also providing seamless access to data and turns it into an asset that supports business growth.

## Why use a Data Fabric Accelerator?

### Time to Value

Build a unified, governed and accessible data environment for data-driven initiatives.

### Cost Effective

Use a smaller budget to understand if this solution is right for your business.

### Business Impact

Gain an understanding of how valuable this solution could be for your organisation.

### Advanced Expertise

Tap into our team of highly trained experts with a broad range of skills.

### Future-Ready Solutions

Get equipped with a scalable, secure, and efficient data fabric solution.

### Informed Decision-Making

Build the foundations to make informed choices about your data initiatives.

## Who is this Accelerator suitable for?

This service is ideal for organisations that:

Have disparate data sources and systems.

Are experiencing rapid data growth and increasing demands for analytics.

Require real-time insights and analytics from streaming data sources.

Have concerns about data governance, security and compliance.

Operate in hybrid or multi-cloud environments, with diverse data sources.

Want to empower businesses with self service analytics and BI capabilities.

## How it works

Using our proprietary template data solution, our proven approach will provide you with data fabric pilot in as little as 8 weeks. We'll enable you to rapidly build and validate a data reporting solution, tailored to your organisation's business needs through a proven 3-step approach:

## Next Steps: Scale and Optimise

Our experts will help identify opportunities to advance your solution and provide a roadmap on the next steps to scale your data fabric platform. When you're ready, we can also manage your solution which allows you to keep benefiting from the platform without the complexity of hosting the system.
