

## Elevate your future business decision making

Data-driven organisations depend on quality machine learning models to look into the future of their business. SCC's Data Analytics Accelerator rapidly delivers the capability to uncover hidden insights, predict for the future and guide decision making. By using our proprietary prebuilt data warehouse and aligning focused analytics requirements, this engagement is a cost-effective way to prove the value of machine learning capabilities in as little as 8 weeks.

## Why use a Data Analytics Accelerator?

### Time to Value

Build ML models with enhanced predictive capability in a matter of weeks.

### Cost Effective

Use a smaller budget to understand if this solution is right for your business.

### Business Impact

Gain an understanding of how valuable this solution could be for your organisation.

### Advanced Expertise

Tap into our team of highly trained experts with a broad range of skills.

### Future-Ready Solutions

Get equipped with a scalable, secure, and efficient data analytics solution.

### Informed Decision-Making

Gain actionable insights to make informed choices about your data initiatives.

## Who is this Accelerator suitable for?

This service is ideal for organisations that:

- ✓ Are struggling with time and expertise to handle and process large and complex datasets
- ✓ Want to scale their analytics solutions to handle increasing data volumes
- ✓ Need to improve data accuracy and quality
- ✓ Want to break the slow development cycle and realise value from their data quicker
- ✓ Are seeking to understand how to spot future trends that will affect your business

## How it works

Using our proprietary template data solution, our proven approach will rapidly provide you with data analytics capability in as little 8 weeks. We'll enable you to build and validate a data analytics pilot, tailored to your organisation's business needs through a proven 3-step approach:

## Next Steps: Scale and Optimise

Our experts will help identify opportunities to grow your solution and provide a roadmap on the next steps to scale your data analytics implementation. When you're ready, we can also manage your solution for you which allows you to keep benefiting from analytics insight without the complexity of hosting the system.
