

Microsoft Azure Cost Optimization Assessment

Optimize Your Azure Costs with Expert Guidance.

Duration: 3 Days

Description

Microsoft Azure offers a flexible and scalable cloud platform for your workloads, but it also requires careful management to avoid unnecessary costs.

One best practice is to turn off or delete any resources that are not in use, such as virtual machines, storage accounts, or databases.

Other ways to optimize your costs is to take advantage of the different pricing options that Azure provides, such as the Azure Savings Plan, Reservations, Hybrid Benefits, and Commitments.

There is more savings potential like optimizing VMs, Storage and Networking, Backup, Monitoring and many other services.

These options can help you pay less for the services you need, which depends on your usage patterns and commitments.

This 3-day remote service is designed to help you identify the most common opportunities regarding service rates and resources usage across your Azure subscriptions.

Agenda

Scoping

- Scoping call to review the prerequisites and structure of the engagement, and assist with tooling setup

Day 1 & 2

- Environment Overview
- Tooling deployment
- Subscriptions data analysis
- Report generation

Day 3

- Continued analysis and report generation
- Internal review of recommendation reports
- Present Executive Assessment Recommendations and Optimization Report

Let's Get Started

Book an assessment to start saving on your Azure costs.

Objectives

- **Understand Your Cost Profile:** Gain insights into the cost structure of your Azure subscriptions.
- **Identify Inefficiencies:** Identify any sources of waste and inefficiency across your subscriptions, resources, and solutions.
- **Prioritize Actions:** Prioritize actions that will help to maximize the cost efficiency of your cloud environment.

Outcomes

- **Periodical Reviewing:** You learned the ins and outs of Azure optimization and how to periodically review your cost profile and identify opportunities for improvement.
- **Recommendations List:** You now have a customized and prioritized list of recommendations to optimize your Azure costs.
- **FinOps Hubs Report:** You deployed a FinOps hubs report to get started with your FinOps reporting.
