THE UK'S LEADING MERCHANTS AND TRADE COUNTER ERP>TRADE SOLUTION

Merchants and Trade Counter
ERP>Trade

ERP>Trade is the complete end-to-end solution for aspiring merchants & trade counter businesses. Built within the worlds most popular mid-market ERP system, Microsoft Dynamics 365 Business Central.

ERP>Trade has achieved Certified for Microsoft Dynamics (CFMD) status

ERP>Trade is a certified Microsoft Dynamics industry add-on developed to Microsoft's own stringent standards. Giving a seamless user experience and best of breed industry specific solution.

With ongoing upgrades so your system never becomes out of date. This is the last ERP System you will ever have to buy!

A solution to run your entire trade merchant and trade counter business

From master product and SKU management with full product & range structure. The pricing & promotions engine is configurable by date, brand, range, branch, customer and customer type to ensure your sales desk and trade counter order handling and pricing is accurate and fast. The trade counter sales system handles full payment, fast search, customer account management leading directly through warehouse pick as well as shop sales. Integration to Magento, Shopify and other e-commerce platforms allows for online and brand sales as well as B2B customer management via our customer portal.
