# Azure-Based Financial Service Automation Solution: 6-Month Implementation

About ScienceSoft

ScienceSoft is a global IT consulting and software development company working in the financial IT domain since 2005. With a full-scale PMO and hands-on experience in Microsoft technologies, we deliver accurate and secure Azure-based solutions loved by financial service employees and customers worldwide, driving project success for our clients no matter what.

WHAT WE OFFER

ScienceSoft helps you implement all components of a financial services automation solution, including:

- A secure Azure-based software infrastructure.
- Role-specific apps for financial service employees and customers.
- Scalable cloud data storage.
- Data analytics built on Microsoft Power BI, Azure Machine Learning, and Azure OpenAI Services.
- Integrations with the necessary internal and third-party systems.
- A web dashboard for solution administration.

Financial service automation use cases we are experienced in:

- Loan origination and servicing.
- Insurance underwriting.
- Insurance claim processing.
- Investment portfolio management.
- Document management.
- Financial and investment accounting.
- Customer relationship management.
- Risk management.
- Operational reporting.

Implementation steps we follow:

- Business analysis and requirements engineering.
- Architecture design.
- UX and UI design.
- Project planning.
- Financial solution development and quality assurance.
- Software integration.
- Data migration.
- Solution launch, support, and maintenance.

Benefits you get:

- Advice on value-adding solution features.
- 1-3 months for the first version of your automation solution.
- 6+ months to obtain fully functional software.
- Optimized development costs.
- Minimized project risks.
- Guaranteed solution accuracy.
- 100% software compliance with relevant regulations: GLBA, AML/OFAC, SEC, GDPR, NYDFS, and more.

OUR CLIENTS SAY

"Brush Claims engaged ScienceSoft to develop a claim software product, and from the outset, their team seamlessly integrated into our processes. They demonstrated a deep understanding of our requirements, and their developers needed minimal supervision, keeping us updated on progress and potential hurdles along the way. Their expertise proved invaluable as we swiftly transitioned from our legacy system to a more flexible, modern solution built on Azure. The value we derived from partnering with ScienceSoft is definitely worth the investment."

– Jen Dalton, Chief Information Security Officer, Brush Claims
