

Plug-and-play data for sustainability and energy management

ScriptString.AI is software that empowers organizations with data extraction, automation, and reporting for portfolio management and energy efficiency analysis.

Save Time - Real-time multi-level data access for everyone

- ✓ Automated data access to climate, utility, and energy data
- ✓ Energy and emissions advanced analytics in just 6 weeks
- ✓ On-demand AI assistant to aid in analyzing your data

Save Money - Quality data to maximize teams productivity

- ✓ Real-time visibility into energy usage patterns across properties
- ✓ Lower the cost of data management and reporting by 80%
- ✓ Quality data all in one place, flexible, accessible, and ready to export

Mitigate Risk - Audit-ready data governance

- ✓ Reports with record of activities, calculations, with drill-down capabilities
- ✓ Anomaly and duplicate detection with actionable user notifications

Industry Partners

"We worked with ScriptString to digitize the energy management process, and as a result, significantly cut the time spent on processing utility data and saved thousands of dollars. Further, Energy Advantage increased productivity and was able to focus on value-add services for our clients."

Brian Plumb - President
