

Dynamics 365 for Finance + Operations: Assessment and Services

Unleashing potential with Intelligent Business Applications

At Scyne, we combine strategic business acumen and public sector expertise with Microsoft's dynamic business applications to provide innovative technology solutions and transformation to governments and their agencies.

Our Services

Finance Transformation (ERP)

Streamline your financial operations and gain deeper insights with our Microsoft Dynamics 365 Finance and Operations expertise.

Customer Engagement (CRM)

Elevate your customer relationships with Dynamics 365 Customer Engagement, creating seamless experiences across sales, customer services, and marketing.

Operational Efficiency (Power Platform + AI)

Achieve operational excellence with our solutions that optimize supply chain processes through D365 Operations and Microsoft Power Platform.

Our Capabilities

Business Transformation

Utilising Microsoft Dynamics 365 and Power Platform, Scyne revolutionizes front and back office operations, enhancing customer engagement, financial, and operational agility.

Public Sector Specific Solutions

Scyne's specialised knowledge about public sector challenges and best practices delivers technologically advanced solutions that are strategically aligned to the needs of governments and their agencies.

Implementation Excellence

Using established architectures and dedicated support, Scyne implements Microsoft business applications swiftly and cost effectively.

Our Commitment

At Scyne we are dedicated to delivering business applications that are not only technologically advanced, but also strategically crafted to meet the public sector's unique challenges.

With the power of Microsoft's intelligent business applications, we empower public services organisations to adapt swiftly to market changes, drive sustainable growth, and achieve a competitive edge.
