Modernize your Data with Azure: 7-Day Workshop

During the workshop, goals are set, gaps are identified, a target landscape based on Azure is designed, a roadmap is proposed, and a cost estimate is developed.

Data-driven business models, analysis of company performance, identification of weaknesses, process improvements and better customer understanding are reasons for the increasingly consistent use of all data as a driver of success.

In our Workshop "Modernize your Data & Analytics with Azure", we look at the actual state of your system and data, identify strengths and weaknesses, and jointly develop a target landscape and roadmap. We address your individual requirements and develop a state-of-the-art target landscape based on the appropriate services in Azure, including cost indication. In addition, we design a proof of concept and migration strategy with you.

We focus on most innovative Azure services like Azure Synpase and Cosmos DB. Azure Synapse is a limitless analytics service that brings together enterprise data warehousing and Big Data analytics. Cosmos DB is Microsoft´s most important NoSQL data base for cloud native applications.

Your benefit:

- Data architecture diagram incl. as-is and to-be analysis.
- Consideration of individual requirements through interactive workshops
- Expert know-how and best practices
- Design of a state-of-the-art target landscape based on Azure services
- Effective and efficient creation of a strategic roadmap.

Agenda:

- Day 1: Review & Discovery
- Day 2: Status-Quo & Envisioning
- Day 3: Gap analysis & target picture
- Day 4: Prioritization & Roadmap
- Day 5-7: Proof of Concept & Migration

Terms & Conditions:

- Duration: approx. 7 days (spread over 2-3 weeks).
- Location: Virtual via Microsoft Teams
- Conducted by: our experts
- Cost: 10.000€ (net price plus VAT)
