SDK

Demystify Data Governance Leveraging Microsoft Purview

An SDK Tek Services Ltd. ("SDK") Briefing

SDK Tek Services Ltd.

SDK: Canadian leaders in Microsoft's Azure data platform. From governance to actionable insights, we lead.

Experience Purview with SDK - At No Cost!

Join us for an enlightening half-day session:

• Discover Purview: Begin with a comprehensive overview followed by a live demonstration of Purview's standout features, turning data governance from a task to an intuitive experience.

• Your Needs, Addressed: Delve deep into a workshop tailored to your organization's tech platforms, processes, and unique data governance challenges. Understand how Purview can be the solution to your organization's needs.

• Reveal SDK's Purview Manager: Augment Purviews power with configuration efficiency, changes in scale all built in an expandable framework.

Purview's Capabilities Showcased:

1. Data Source Setup: Seamlessly integrate your data assets with Purview's catalog.
2. Searchable Catalog: Think of it as an online shopping experience but for your data assets.
3. Data Curation: Enrich data properties to enhance its value for end-users.
4. Data Lineage Clarity: Visualize data transformations, ensuring clarity throughout its journey.
5. Data Estate Overview: Empower leadership with dashboards reflecting governance adoption.
6. Custom Exploration: SDK is poised to dive deeper into specific areas, ensuring you get the most out of Purview.
7. Extendable with a full suite of API's: SDK has built out an accelerator ("Purview Manager") to showcase how powerful those API's.
