

Data and AI Engagement

An SDK Tek Services Ltd. (“SDK”) Briefing

Are you looking for a way to leverage the power of data and AI on Azure? Do you want to learn how to use Fabric, Purview, and AI to create scalable, secure, and intelligent solutions?

This is a **no-cost, two-hour** pre-sales consulting engagement that will help you understand the benefits and best practices of using Fabric, Purview, and AI on Azure. You will get to interact with a certified Azure Data and AI expert who will guide you through the following topics:

- Fabric: A cloud-native data platform that enables you to ingest, transform, store, and analyze data from various sources and formats on Azure.
- Purview: A unified data governance service that helps you discover, catalog, classify, and monitor your data assets across Azure and other sources.
- AI: A suite of services and tools that enable you to build, deploy, and manage AI applications and models on Azure.

By the end of this engagement, you will have a clear vision of how to use Fabric, Purview, and AI to accelerate your data and AI journey on Azure. You will also receive a customized roadmap and recommendations for your next steps.

To get started, please complete the information form and we will contact you shortly to schedule your session. We look forward to working with you!

SDK Tek Services Ltd has deep expertise in production implementations of both Microsoft Fabric and Microsoft Purview. We help businesses adapt to rapid change by investing in our highly-skilled, cloud-savvy, driven teams that can tackle all your current and future challenges.
