

# Power Business Decisions with Cloud-Scale Analytics from Microsoft Fabric

An SDK Tek Services Ltd. (“SDK”) Briefing

## SDK Tek Services Ltd.

SDK: Canadian leaders in Microsoft's Azure data platform. From governance to actionable insights, we lead.

## Experience Fabric with SDK - At No Cost!

### Join us for an enlightening half-day session:

- Discover Fabric: Begin with a comprehensive overview followed by a live demonstration of Fabric's standout features, unifying hybrid and multi-cloud data estates for faster, connected intelligence.
- Your Needs, Addressed: Dive deep into a workshop tailored to your organization's tech platforms, processes and unique data estates. Understand how Fabric can be the solution to your organization's needs.

### Fabric's Capabilities Showcased:

1. Unify your hybrid and multi-cloud enterprise data estate for analytics: Establish a regulated hub to centralize and organize all your business data, creating a foundation for innovative analytics. Streamline your workloads and enable your data engineers to spin up analytics solutions faster than ever before.
2. Build fit-for-purpose analytics models: Leverage the full potential of your data by constructing ML and AI models on a connected foundation with no data movement. Enable data scientists to perform analysis on large volumes of data in real time leveraging the tools and languages they already know.
3. Responsibly democratize analytics with data governance: Connect the services you need to enable an open, scalable analytics platform with built-in security and governance. Equip your data engineers, data scientists, and data analysts to access the right data, at the right time, for ease of democratization.
4. Scale transformative analytics applications: Equip data analysts and data citizens with robust self-service analytics tools to expedite innovation with real time insights. Create connected intelligence for all applications to enable better decision-making and transformative impact.
5. Govern and protect your data: Responsibly connect people and data using an open platform with built-in security, governance, and compliance. Use the expertise and resources of Microsoft to keep your data secure, patch vulnerabilities, monitor threats, and comply with regulations.

*“Before Microsoft Fabric, our data processes were redundant, siloed, manual, and slow. Now, not only have we achieved unified, real-time insights, but our decision-making is faster and more accurate than ever. We are now able to focus on our core purpose of finding solutions, not wasting time wrestling data.”*
