S D K

Accelerate Your Development

- **Built on best practices and proven patterns**

- **Speed up your ELT development**

- **Metadata driven for quick additions**

Data Accelerator

Accelerate your ELT Development

- Configuration driven ELT pipelines
- Built-In and customizable data quality
- Supports streaming and traditional data sources
- Near-real time ELT logic
- Integrates with Data DevOps

Job Manager

Centralize your ELT Orchestration

- Centralize ELT orchestration across multiple Azure services
- Schedule and execute ELT pipelines
- Monitoring and reporting in Power BI
- Execution and ELT metrics tracking and analysis
- APIs for connectivity to external sources and tools

SDK

Accelerate Your Deployments

MLOps Accelerator

Most ML Models don't go to production – get it there!

- Covers full life cycle from: prototyping, training, serving up the model as a web service, and producing an inference pipeline
- Cut the resources and time that are required to take machine learning models to production
- Maintains and monitors the performance of the model
- Flexible to Fit Data Scientists' Preferences

- **Run it smoother**

- **Get it there faster**

- **Monitor and Increase performance**

Data DevOps Accelerator

Automation to improve Code Stability and Supportability

- Terraform, bicep and arm resource templates for speedy managed deployment of resources
- DevOps pipeline templates for quick deployment of your code
- Parameter driven to reduce duplication
- Branching strategy for releases

SDK

Accelerate Your Analysis

- **Surface key information about your data and reports**

- **Focus on value by delivering reports quickly**

- **Tools to make your governance process easier**

Power BI Accelerator

Speed up your report development and management

- Management methodology that promotes efficient use
- Easily move from early stage POC to enterprise grade
- Template generator to ensure consistent report design
- Turnkey auditing of tenant and user activities
- Top-down reporting framework to drive story telling with data

Metadata Manager

Know more about your reports while using them

- App for Power BI report structure data entry
- Centralizes metadata repository for all business reports at the lowest level item
- Accessibility of the metadata within the business reports
- Consistent and trustable report metrics
- Helps reduce duplication of analytics
