Silver Data Platform
Silver Communications
Silver Windows and Devices

Evolve your PMO and master new organizational platforms to align agile work with critical strategic initiatives

ABOUT seaCastle, Inc:

We are Microsoft Project pioneers with decades of experience in project and portfolio management (PPM). We were early adopters of cloud technology 20 years ago and even more so today, using Artificial Intelligence (AI), Azure, the Internet of Things, and Microsoft Teams to improve PPM results.

See what customers are saying:

"We started small but once we saw all we could do, how easy it was, and how much of it was free, we were all-in pretty quickly."

– Ian Bowman, Founder, WorkAdaptive

WHAT WE OFFER

Many partners support Microsoft Teams. Fewer partners support Microsoft Project. Only one partner – seaCastle, Inc – offers a configuration and management approach to Teams to keep from losing sight of what the portfolio is supposed to accomplish while protecting against project data getting lost in the wrong channels and conversations.

Microsoft Teams is a platform which integrates with every aspect of M365 to include Office products and 3rd party apps seamlessly. Incorporate Microsoft Project, Tasks by Planner and To Do, Project Operations, or any other project management tool you want to use including what you've built yourself..

See program and/or project data in near real time using dashboards defined by you tailored to your needs. Gain insight into decision making from Analytics. Use cognitive services to manage risks and issues. Forecast costs and benefits with precision.

Build deeper integration and value in Microsoft Teams for your organization with Power Platform products like Power BI, Power Apps, and Power Automate. Leverage Azure Active Directory and collaborate widely in trusted environments!

Why Microsoft 365?

Save your company money

Microsoft 365 is available as a simple monthly subscription. Avoid large up-front costs for new software while moving the cost of IT from capital to operating expense. And without on-premises servers to run email, websites, and document storage, you can reduce energy costs and save by no longer purchasing new server hardware.

Scale your business quickly and flexibly

Microsoft 365 grows with you on the Microsoft Azure cloud. Adding a new user is as simple as buying an additional license, which allows access to business-critical technology on up to five PCs/Macs and five mobile devices. Microsoft 365 provides many plans to fit the right capability needs and price points for each user in your organization.

Technical support

Your Microsoft 365 subscription comes with 24/7 support from a global network of experts, with one-hour response for critical, service-impacting events.

Financially backed SLA

Get peace of mind knowing your services are available when you need them with a financially backed, 99.9% uptime service-level agreement.

Simplified IT management

Reduce headaches by reducing your IT infrastructure. Content lives safely in globally distributed data centers with continuous backup and disaster recovery abilities.

Microsoft 365 is a cloud-based subscription service that brings together the best tools for the way people work today. By combining best-in-class apps like Excel and Outlook with powerful cloud services like OneDrive and Microsoft Teams, Microsoft 365 lets anyone create and share anywhere on any device.

Key use cases

Business-class email

Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

Cloud storage

Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

Meet online

Get actionable insights from your data by taking advantage of a fully compatible, enterprise-ready Hadoop service.

Collaborate, chat privately

Accelerate your mobile app development by using a backend hosted on Microsoft Azure.
