

# BlueThink™ GO

SEALAB is proudly offering the aquaculture industry BlueThink GO. A service that allows you to access your fish farm from anywhere, anytime.

## Who is BlueThink GO relevant to?

### THE OFFICE MANAGER

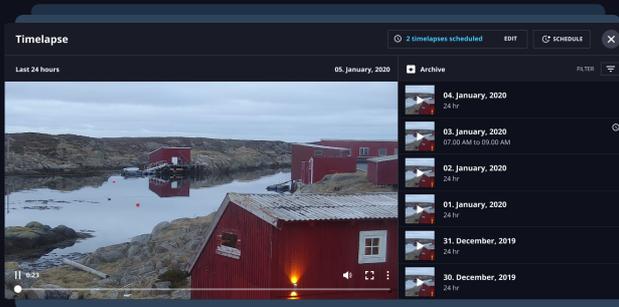

Who wants to check if the delousing is still ongoing.

### THE SITE MANAGER

Who wants to monitor safety parameters, to decide if the fish farmers can safely return and work from the site again?

### THE FISH FARMER

Who wants to monitor and download the oxygen levels for the last week.

## Timelapse

During storms or unexpected events, it may be helpful to see a time-lapse from the previous days. Beside daily generated time-lapses, you can schedule customised time-lapses as well.

## Livestream

SEALAB quality images – at the tip of your finger. Livestream from the surface camera allows you to monitor the plant at any time.

## Data history

All sensor boxes contains historical data. The data can be exported to excel and saved for as long as you want.
