

Secude HaloCAD

Secure your CAD files. Protect your IP. Safeguard your future.

Are your CAD files secure if they fall into the wrong hands? With each employee, partner and device representing a potential security gap, you risk costly and time-consuming data breaches without automatic file security.

HaloCAD is the only Microsoft Purview Information Protection (MPIP) extension that automatically secures CAD files, protecting your IP and safeguarding your future.

Microsoft Purview Information Protection (MPIP) Extension to CAD Applications	Lifelong CAD Encryption	Flexible Security Settings
HaloCAD extends MPIP to your CAD applications, securing your sensitive CAD data without affecting the end-user experience.	HaloCAD applies MPIP authorization tags to CAD files at the point of origin, ensuring sensitive data is encrypted inside and outside of your IT perimeter.	HaloCAD enforces file security depending on the chosen MPIP sensitivity label, including read-only privileges, password-controlled access and admin-only use.

With HaloCAD:

- **Secure CAD files wherever they travel.** HaloCAD's lifelong access control protects your priceless CAD files inside and outside your IT perimeter, securing vital information within your business and also when collaborating with partners.
- **End damage from data leaks.** HaloCAD's automatic data protection secures your sensitive CAD files even if they're leaked or stolen, ensuring your revenue, reputation and resources are always protected if data breaches occur.
- **Use compliance as a competitive advantage.** HaloCAD's in-built security enables you to easily demonstrate compliance to auditors, avoid penalties and win business by showcasing top-of-the-range data protection (i.e. meeting NIS2 or CMMC requirements).

"With HaloCAD, we found a smart data security solution that is powerful, simple to deploy, and integrates with our existing security solutions," Plasser India

About Secude

Secude, a Microsoft and SAP Partner, is a global leader for Zero Trust data protection and data governance.

Secude has been protecting the data of Fortune 500 and DAX-listed companies for over 25 years. Our Microsoft Purview Information Protection (MPIP) extension embeds Zero Trust protection and data governance into our customers sensitive files from creation, preventing data leakage, reputational damage and non-compliance.
